(i) that the amount of the monthly premium an eligible individual is required to pay for coverage under the standard health plan for the individual and the individual's dependents does not exceed the amount of the monthly premium that the eligible individual would have been required to pay (in the rating area in which the individual resides) if the individual had enrolled in the applicable second lowest cost silver plan (as defined in section 36B(b)(3)(B) of the Internal Revenue Code of 1986) offered to the individual through an Exchange; and

(ii) that the cost-sharing an eligible individual is required to pay under the standard health plan does not exceed—

This determination shall take into consideration the experience of other States with respect to participation in an Exchange and such credits and reductions provided to residents of the other States, with a special focus on enrollees with income below 200 percent of poverty.

(iii) **CERTIFICATION.**—The Chief Actuary of the Centers for Medicare & Medicaid Services, in consultation with the Office of Tax Analysis of the Department of the Treasury, shall certify whether the methodology used to make determinations under this subparagraph, and such determinations, meet the requirements of clause (ii). (e) **TERM OF WAIVER.**—No waiver under this section may extend over a period of longer than 5 years unless the State requests continuation of such waiver, and such request shall be deemed granted unless the Secretary, within 90 days after the date of its submission to the Secretary, either denies such request in writing or informs the State in writing with respect to any additional information which is needed in order to make a final determination with respect to the request.

SEC. 1333. PROVISIONS RELATING TO OFFERING OF PLANS IN MORE THAN ONE STATE.

(a) **HEALTH CARE CHOICE COMPACTS.**—

(1) **IN GENERAL.**—Not later than July 1, 2013, the Secretary shall, in consultation with the National Association of Insurance Commissioners, issue regulations for the creation of health care choice compact under which 2 or more States may enter into an agreement under which—

(A) 1 or more qualified health plans could be offered in the individual markets in all such States but, except as provided in subparagraph (B), only be subject to the laws and regulations of the State in which the plan was written or issued;

(B) the issuer of any qualified health plan to which the compact applies—

(i) would continue to be subject to market conduct, unfair trade practices, network adequacy, and consumer protection standards (including standards relating to rating), including addressing disputes as to the performance of the contract, of the State in which the purchaser resides;

(ii) would be required to be licensed in each State in which it offers the plan under the compact or to submit to the jurisdiction of each such State with regard to the standards described in clause (i) (including allowing access to records as if the insurer were licensed in the State); and

(iii) must clearly notify consumers that the policy may not be subject to all the laws and regulations of the State in which the purchaser resides.

(2) **STATE AUTHORITY.**—A State may not enter into an agreement under this subsection unless the State enacts a law after the date of the enactment of this title that specifically authorizes the State to enter into such agreements.

(3) **APPROVAL OF COMPACTS.**—The Secretary may approve interstate health care choice compacts under paragraph (1) only if the Secretary determines that such health care choice compact—

(A) will provide coverage that is at least as comprehensive as the coverage defined in section 1302(b) and offered through Exchanges established under this title;

(B) will provide coverage and cost sharing protections against excessive out-of-pocket spending that are at least as affordable as the provisions of this title would provide;

(C) will provide coverage to at least a comparable number of its residents as the provisions of this title would provide;

(D) will not increase the Federal deficit; and

(E) will not weaken enforcement of laws and regulations described in paragraph (1)(B)(i) in any State that is included in such compact.

(4) **EFFECTIVE DATE.**—A health care choice compact described in paragraph (1) shall not take effect before January 1, 2016.

(b) **AUTHORITY FOR NATIONWIDE PLANS.**—

(1) **IN GENERAL.**—Except as provided in paragraph (2), if an issuer (including a group of health insurance issuers affiliated either by common ownership and control or by the common use of a nationally licensed service mark) of a qualified health plan in the individual or small group market meets the requirements of this subsection (in this subsection a “nationwide qualified health plan”)—

(A) the issuer of the plan may offer the nationwide qualified health plan in the individual or small group market in more than 1 State; and

(B) with respect to State laws mandating benefit coverage by a health plan, only the State laws of the State in which such plan is written or issued shall apply to the nationwide qualified health plan.

(2) **STATE OPT-OUT.**—A State may, by specific reference in a law enacted after the date of enactment of this title, provide that this subsection shall not apply to that State. Such opt-out shall be effective until such time as the State by law revokes it.

(3) **PLAN REQUIREMENTS.**—An issuer meets the requirements of this subsection with respect to a nationwide qualified health plan if, in the determination of the Secretary—

(A) the plan offers a benefits package that is uniform in each State in which the plan is offered and meets the requirements set forth in paragraphs (4) through (6);

(B) the issuer is licensed in each State in which it offers the plan and is subject to all requirements of State law not inconsistent with this section, including but not limited to, the standards and requirements that a State imposes that do not prevent the application of a requirement of part A of title XXVII of the Public Health Service Act or a requirement of this title;

(C) the issuer meets all requirements of this title with respect to a qualified health plan, including the requirement to offer the silver and gold levels of the plan in each Exchange in the State for the market in which the plan is offered;

(D) the issuer determines the premiums for the plan in any State on the basis of the rating rules in effect in that State for the rating areas in which it is offered;

(E) the issuer offers the nationwide qualified health plan in at least 60 percent of the participating States in the first year in which the plan is offered, 65 percent of such States in the second year, 70 percent of such States in the third year, 75 percent of such States in the fourth year, and 80 percent of such States in the fifth and subsequent years;

(F) the issuer shall offer the plan in participating States across the country, in all geographic regions, and in all States that have adopted adjusted community rating before the date of enactment of this Act; and

(G) the issuer clearly notifies consumers that the policy may not contain some benefits otherwise mandated for plans in the State in which the purchaser resides and provides a detailed statement of the benefits offered and the benefit differences in that State, in accordance with rules promulgated by the Secretary.

(4) **FORM REVIEW FOR NATIONWIDE PLANS.**—Notwithstanding any contrary provision of State law, at least 3 months before any nationwide qualified health plan is offered, the issuer shall file all nationwide qualified health plan forms with the regulator in each participating State in which the plan will be offered. An issuer may appeal the disapproval of a nationwide qualified health plan form to the Secretary.

(5) **APPLICABLE RULES.**—The Secretary shall, in consultation with the National Association of Insurance Commissioners, issue rules for the offering of nationwide qualified health plans under this subsection. Nationwide qualified health plans may be offered only after such rules have taken effect.

(7) **STATE LAW MANDATING BENEFIT COVERAGE BY A HEALTH BENEFITS PLAN.**—For the purposes of this subsection, a State law mandating benefit coverage by a health plan is a law that mandates health insurance coverage or the offer of health insurance coverage for specific health services or specific diseases. A law that mandates health insurance coverage or reimbursement for services provided by certain classes of providers of health care services, or a law that mandates that certain classes of individuals must be covered as a group or as dependents, is not a State law mandating benefit coverage by a health benefits plan.

PART V—REINSURANCE AND RISK ADJUSTMENT

SEC. 1341. TRANSITIONAL REINSURANCE PROGRAM FOR INDIVIDUAL AND SMALL GROUP MARKETS IN EACH STATE.

(a) **IN GENERAL.**—Each State shall, not later than January 1, 2014—

(1) include in the Federal standards or State law or regulation the State adopts and has in

effect under section 1321(b) the provisions described in subsection (b); and

(2) establish (or enter into a contract with) 1 or more applicable reinsurance entities to carry out the reinsurance program under this section.

(b) **MODEL REGULATION.**—

(1) **IN GENERAL.**—In establishing the Federal standards under section 1321(a), the Secretary, in consultation with the National Association of Insurance Commissioners (the “NAIC”), shall include provisions that enable States to establish and maintain a program under which—

(A) health insurance issuers, and third party administrators on behalf of group health plans, are required to make payments to an applicable reinsurance entity for any plan year beginning in the 3-year period beginning January 1, 2014 (as specified in paragraph (3)); and

(B) the applicable reinsurance entity collects payments under subparagraph (A) and uses amounts so collected to make reinsurance payments to health insurance issuers described in subparagraph (A) that cover high risk individuals in the individual market (excluding grandfathered health plans) for any plan year beginning in such 3-year period.

(2) **HIGH-RISK INDIVIDUAL; PAYMENT AMOUNTS.**—The Secretary shall include the following in the provisions under paragraph (1):

(A) **DETERMINATION OF HIGH-RISK INDIVIDUALS.**—The method by which individuals will be identified as high risk individuals for purposes of the reinsurance program established under this section. Such method shall provide for identification of individuals as high-risk individuals on the basis of—

(i) a list of at least 50 but not more than 100 medical conditions that are identified as high-risk conditions and that may be based on the identification of diagnostic and procedure codes that are indicative of individuals with pre-existing, high-risk conditions; or

(ii) any other comparable objective method of identification recommended by the American Academy of Actuaries.

(B) **PAYMENT AMOUNT.**—The formula for determining the amount of payments that will be paid to health insurance issuers described in paragraph (1)(A) that insure high-risk individuals. Such formula shall provide for the equitable allocation of available funds through reconciliation and may be designed—

(i) to provide a schedule of payments that specifies the amount that will be paid for each of the conditions identified under subparagraph (A); or

(ii) to use any other comparable method for determining payment amounts that is recommended by the American Academy of Actuaries and that encourages the use of care coordination and care management programs for high risk conditions.

(3) **DETERMINATION OF REQUIRED CONTRIBUTIONS.**—

(A) **IN GENERAL.**—The Secretary shall include in the provisions under paragraph (1) the method for determining the amount each health insurance issuer and group health plan described in paragraph (1)(A) contributing to the reinsurance program under this section is required to contribute under such paragraph for each plan year beginning in the 36-month period beginning January 1, 2014. The contribution amount for any plan year may be based on the percentage of revenue of each issuer and the total costs of providing benefits to enrollees in self-insured plans or on a specified amount per enrollee and may be required to be paid in advance or periodically throughout the plan year.

(B) **SPECIFIC REQUIREMENTS.**—The method under this paragraph shall be designed so that—

(i) the contribution amount for each issuer proportionally reflects each issuer's fully insured commercial book of business for all major

medical products and the total value of all fees charged by the issuer and the costs of coverage administered by the issuer as a third party administrator;

(ii) the contribution amount can include an additional amount to fund the administrative expenses of the applicable reinsurance entity;

(iii) the aggregate contribution amounts for all States shall, based on the best estimates of the NAIC and without regard to amounts described in clause (ii), equal \$10,000,000,000 for plan years beginning in 2014, \$6,000,000,000 for plan years beginning in 2015, and \$4,000,000,000 for plan years beginning in 2016; and

(iv) in addition to the aggregate contribution amounts under clause (iii), each issuer's contribution amount for any calendar year under clause (iii) reflects its proportionate share of an additional \$2,000,000,000 for 2014, an additional \$2,000,000,000 for 2015, and an additional \$1,000,000,000 for 2016.

Nothing in this subparagraph shall be construed to preclude a State from collecting additional amounts from issuers on a voluntary basis.

(4) EXPENDITURE OF FUNDS.—The provisions under paragraph (1) shall provide that—

(A) the contribution amounts collected for any calendar year may be allocated and used in any of the three calendar years for which amounts are collected based on the reinsurance needs of a particular period or to reflect experience in a prior period; and

(B) amounts remaining unexpended as of December, 2016, may be used to make payments under any reinsurance program of a State in the individual market in effect in the 2-year period beginning on January 1, 2017.

Notwithstanding the preceding sentence, any contribution amounts described in paragraph (3)(B)(iv) shall be deposited into the general fund of the Treasury of the United States and may not be used for the program established under this section.

(c) APPLICABLE REINSURANCE ENTITY.—For purposes of this section—

(1) IN GENERAL.—The term “applicable reinsurance entity” means a not-for-profit organization—

(A) the purpose of which is to help stabilize premiums for coverage in the individual and small group markets in a State during the first 3 years of operation of an Exchange for such markets within the State when the risk of adverse selection related to new rating rules and market changes is greatest; and

(B) the duties of which shall be to carry out the reinsurance program under this section by coordinating the funding and operation of the risk-spreading mechanisms designed to implement the reinsurance program.

(2) STATE DISCRETION.—A State may have more than 1 applicable reinsurance entity to carry out the reinsurance program under this section within the State and 2 or more States may enter into agreements to provide for an applicable reinsurance entity to carry out such program in all such States.

(3) ENTITIES ARE TAX-EXEMPT.—An applicable reinsurance entity established under this section shall be exempt from taxation under chapter 1 of the Internal Revenue Code of 1986. The preceding sentence shall not apply to the tax imposed by section 511 such Code (relating to tax on unrelated business taxable income of an exempt organization).

(d) COORDINATION WITH STATE HIGH-RISK POOLS.—The State shall eliminate or modify any State high-risk pool to the extent necessary to carry out the reinsurance program established under this section. The State may coordinate the State high-risk pool with such program to the extent not inconsistent with the provisions of this section.

SEC. 1342. ESTABLISHMENT OF RISK CORRIDORS FOR PLANS IN INDIVIDUAL AND SMALL GROUP MARKETS.

(a) IN GENERAL.—The Secretary shall establish and administer a program of risk corridors for calendar years 2014, 2015, and 2016 under which a qualified health plan offered in the individual or small group market shall participate in a payment adjustment system based on the ratio of the allowable costs of the plan to the plan's aggregate premiums. Such program shall be based on the program for regional participating provider organizations under part D of title XVIII of the Social Security Act.

(b) PAYMENT METHODOLOGY.—

(1) PAYMENTS OUT.—The Secretary shall provide under the program established under subsection (a) that if—

(A) a participating plan's allowable costs for any plan year are more than 103 percent but not more than 108 percent of the target amount, the Secretary shall pay to the plan an amount equal to 50 percent of the target amount in excess of 103 percent of the target amount; and

(B) a participating plan's allowable costs for any plan year are more than 108 percent of the target amount, the Secretary shall pay to the plan an amount equal to the sum of 2.5 percent of the target amount plus 80 percent of allowable costs in excess of 108 percent of the target amount.

(2) PAYMENTS IN.—The Secretary shall provide under the program established under subsection (a) that if—

(A) a participating plan's allowable costs for any plan year are less than 97 percent but not less than 92 percent of the target amount, the plan shall pay to the Secretary an amount equal to 50 percent of the excess of 97 percent of the target amount over the allowable costs; and

(B) a participating plan's allowable costs for any plan year are less than 92 percent of the target amount, the plan shall pay to the Secretary an amount equal to the sum of 2.5 percent of the target amount plus 80 percent of the excess of 92 percent of the target amount over the allowable costs.

(c) DEFINITIONS.—In this section:

(1) ALLOWABLE COSTS.—

(A) IN GENERAL.—The amount of allowable costs of a plan for any year is an amount equal to the total costs (other than administrative costs) of the plan in providing benefits covered by the plan.

(B) REDUCTION FOR RISK ADJUSTMENT AND REINSURANCE PAYMENTS.—Allowable costs shall be reduced by any risk adjustment and reinsurance payments received under section 1341 and 1343.

(2) TARGET AMOUNT.—The target amount of a plan for any year is an amount equal to the total premiums (including any premium subsidies under any governmental program), reduced by the administrative costs of the plan.

SEC. 1343. RISK ADJUSTMENT.

(a) IN GENERAL.—

(1) LOW ACTUARIAL RISK PLANS.—Using the criteria and methods developed under subsection (b), each State shall assess a charge on health plans and health insurance issuers (with respect to health insurance coverage) described in subsection (c) if the actuarial risk of the enrollees of such plans or coverage for a year is less than the average actuarial risk of all enrollees in all plans or coverage in such State for such year that are not self-insured group health plans (which are subject to the provisions of the Employee Retirement Income Security Act of 1974).

(2) HIGH ACTUARIAL RISK PLANS.—Using the criteria and methods developed under subsection (b), each State shall provide a payment to health plans and health insurance issuers (with respect to health insurance coverage) described in subsection (c) if the actuarial risk of the enrollees of such plans or coverage for a year is

greater than the average actuarial risk of all enrollees in all plans and coverage in such State for such year that are not self-insured group health plans (which are subject to the provisions of the Employee Retirement Income Security Act of 1974).

(b) CRITERIA AND METHODS.—The Secretary, in consultation with States, shall establish criteria and methods to be used in carrying out the risk adjustment activities under this section. The Secretary may utilize criteria and methods similar to the criteria and methods utilized under part C or D of title XVIII of the Social Security Act. Such criteria and methods shall be included in the standards and requirements the Secretary prescribes under section 1321.

(c) SCOPE.—A health plan or a health insurance issuer is described in this subsection if such health plan or health insurance issuer provides coverage in the individual or small group market within the State. This subsection shall not apply to a grandfathered health plan or the issuer of a grandfathered health plan with respect to that plan.

(a) IN GENERAL.—Subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1986 (relating to refundable credits) is amended by inserting after section 36A the following new section:

“SEC. 36B. REFUNDABLE CREDIT FOR COVERAGE UNDER A QUALIFIED HEALTH PLAN.

“(a) IN GENERAL.—In the case of an applicable taxpayer, there shall be allowed as a credit against the tax imposed by this subtitle for any taxable year an amount equal to the premium assistance credit amount of the taxpayer for the taxable year.

“(b) PREMIUM ASSISTANCE CREDIT AMOUNT.—For purposes of this section—

“(1) IN GENERAL.—The term ‘premium assistance credit amount’ means, with respect to any taxable year, the sum of the premium assistance amounts determined under paragraph (2) with respect to all coverage months of the taxpayer occurring during the taxable year.

“(2) PREMIUM ASSISTANCE AMOUNT.—The premium assistance amount determined under this subsection with respect to any coverage month is the amount equal to the lesser of—

“(A) the monthly premiums for such month for 1 or more qualified health plans offered in the individual market within a State which cover the taxpayer, the taxpayer's spouse, or any dependent (as defined in section 152) of the taxpayer and which were enrolled in through an Exchange established by the State under 1311 of the Patient Protection and Affordable Care Act, or

“(B) the excess (if any) of—

“(i) the adjusted monthly premium for such month for the applicable second lowest cost silver plan with respect to the taxpayer, over

“(ii) an amount equal to 1/12 of the product of the applicable percentage and the taxpayer's household income for the taxable year.

“(3) OTHER TERMS AND RULES RELATING TO PREMIUM ASSISTANCE AMOUNTS.—For purposes of paragraph (2)—

“(A) APPLICABLE PERCENTAGE.—

“(i) IN GENERAL.—Except as provided in clause (ii), the applicable percentage with respect to any taxpayer for any taxable year is equal to 2.8 percent, increased by the number of percentage points (not greater than 7) which bears the same ratio to 7 percentage points as—

“(I) the taxpayer’s household income for the taxable year in excess of 100 percent of the poverty line for a family of the size involved, bears to

“(II) an amount equal to 200 percent of the poverty line for a family of the size involved.

“(ii) SPECIAL RULE FOR TAXPAYERS UNDER 133 PERCENT OF POVERTY LINE.—If a taxpayer’s household income for the taxable year is in excess of 100 percent, but not more than 133 percent, of the poverty line for a family of the size involved, the taxpayer’s applicable percentage shall be 2 percent.

“(iii) INDEXING.—In the case of taxable years beginning in any calendar year after 2014, the Secretary shall adjust the initial and final applicable percentages under clause (i), and the 2 percent under clause (ii), for the calendar year to reflect the excess of the rate of premium growth between the preceding calendar year and 2013 over the rate of income growth for such period.

“(B) APPLICABLE SECOND LOWEST COST SILVER PLAN.—The applicable second lowest cost silver plan with respect to any applicable taxpayer is the second lowest cost silver plan of the individual market in the rating area in which the taxpayer resides which—

“(i) is offered through the same Exchange through which the qualified health plans taken into account under paragraph (2)(A) were offered, and

“(ii) provides—

“(I) self-only coverage in the case of an applicable taxpayer—

“(aa) whose tax for the taxable year is determined under section 1(c) (relating to unmarried individuals other than surviving spouses and heads of households) and who is not allowed a deduction under section 151 for the taxable year with respect to a dependent, or

“(bb) who is not described in item (aa) but who purchases only self-only coverage, and

“(II) family coverage in the case of any other applicable taxpayer.

If a taxpayer files a joint return and no credit is allowed under this section with respect to 1 of the spouses by reason of subsection (e), the taxpayer shall be treated as described in clause (ii)(I) unless a deduction is allowed under section 151 for the taxable year with respect to a dependent other than either spouse and subsection (e) does not apply to the dependent.

“(C) ADJUSTED MONTHLY PREMIUM.—The adjusted monthly premium for an applicable second lowest cost silver plan is the monthly premium which would have been charged (for the rating area with respect to which the premiums under paragraph (2)(A) were determined) for the plan if each individual covered under a qualified health plan taken into account under paragraph (2)(A) were covered by such silver plan and the premium was adjusted only for the age of each such individual in the manner allowed under section 2701 of the Public Health Service Act. In the case of a State participating in the wellness discount demonstration project under section 2705(d) of the Public Health Service Act, the adjusted monthly premium shall be determined without regard to any premium discount or rebate under such project.

“(ii) a State requires a qualified health plan under section 1311(d)(3)(B) of such Act to cover benefits in addition to the essential health benefits required to be provided by the plan,

the portion of the premium for the plan properly allocable (under rules prescribed by the Secretary of Health and Human Services) to such

additional benefits shall not be taken into account in determining either the monthly premium or the adjusted monthly premium under paragraph (2).

“(E) SPECIAL RULE FOR PEDIATRIC DENTAL COVERAGE.—For purposes of determining the amount of any monthly premium, if an individual enrolls in both a qualified health plan and a plan described in section 1311(d)(2)(B)(ii)(I) of the Patient Protection and Affordable Care Act for any plan year, the portion of the premium for the plan described in such section that (under regulations prescribed by the Secretary) is properly allocable to pediatric dental benefits which are included in the essential health benefits required to be provided by a qualified health plan under section 1302(b)(1)(J) of such Act shall be treated as a premium payable for a qualified health plan.

“(1) APPLICABLE TAXPAYER.—

This clause shall also apply to an individual who is eligible to enroll in the plan by reason of a relationship the individual bears to the employee.

“(ii) COVERAGE MUST PROVIDE MINIMUM VALUE.—Except as provided in clause (iii), an employee shall not be treated as eligible for minimum essential coverage if such coverage consists of an eligible employer-sponsored plan (as defined in section 5000A(f)(2)) and the plan’s share of the total allowed costs of benefits provided under the plan is less than 60 percent of such costs.

“(iii) EMPLOYEE OR FAMILY MUST NOT BE COVERED UNDER EMPLOYER PLAN.—Clauses (i) and (ii) shall not apply if the employee (or any individual described in the last sentence of clause (i)) is covered under the eligible employer-sponsored plan or the grandfathered health plan.

(1) the Secretary shall notify the issuer of the plan of such eligibility; and

(2) the issuer shall reduce the cost-sharing under the plan at the level and in the manner specified in subsection (c).

(b) ELIGIBLE INSURED.—In this section, the term “eligible insured” means an individual—

(1) who enrolls in a qualified health plan in the silver level of coverage in the individual market offered through an Exchange; and

(2) whose household income exceeds 100 percent but does not exceed 400 percent of the poverty line for a family of the size involved.

In the case of an individual described in section 36B(c)(1)(B) of the Internal Revenue Code of 1986, the individual shall be treated as having household income equal to 100 percent for purposes of applying this section.

(c) DETERMINATION OF REDUCTION IN COST-SHARING.—

(1) REDUCTION IN OUT-OF-POCKET LIMIT.—

(A) IN GENERAL.—The reduction in cost-sharing under this subsection shall first be achieved by reducing the applicable out-of-pocket limit under section 1302(c)(1) in the case of—

(i) an eligible insured whose household income is more than 100 percent but not more than 200 percent of the poverty line for a family of the size involved, by two-thirds;

(I) 90 percent in the case of an eligible insured described in paragraph (2)(A);

(II) 80 percent in the case of an eligible insured described in paragraph (2)(B); and

(III) 70 percent in the case of an eligible insured described in clause (ii) or (iii) of subparagraph (A).

(2) ADDITIONAL REDUCTION FOR LOWER INCOME INSURED.—The Secretary shall establish procedures under which the issuer of a qualified health plan to which this section applies shall further reduce cost-sharing under the plan in a manner sufficient to—

(A) in the case of an eligible insured whose household income is not less than 100 percent but not more than 150 percent of the poverty line for a family of the size involved, increase the plan's share of the total allowed costs of benefits provided under the plan to 90 percent of such costs; and

(5) **SPECIAL RULE FOR PEDIATRIC DENTAL PLANS.**—If an individual enrolls in both a qualified health plan and a plan described in section 1311(d)(2)(B)(ii)(I) for any plan year, subsection (a) shall not apply to that portion of any reduction in cost-sharing under subsection (c) that (under regulations prescribed by the Secretary) is properly allocable to pediatric dental benefits which are included in the essential health benefits required to be provided by a qualified health plan under section 1302(b)(1)(J).

(d) SPECIAL RULES FOR INDIANS.—

(1) **INDIANS UNDER 300 PERCENT OF POVERTY.**—If an individual enrolled in any qualified health plan in the individual market through an Exchange is an Indian (as defined in section 4(d) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(d))) whose household income is not more than 300 percent of the poverty line for a family of the size involved, then, for purposes of this section—

(A) such individual shall be treated as an eligible insured; and

(e) **RULES FOR INDIVIDUALS NOT LAWFULLY PRESENT.—**

(1) **IN GENERAL.**—If an individual who is an eligible insured is not lawfully present—

(A) no cost-sharing reduction under this section shall apply with respect to the individual; and

(B) for purposes of applying this section, the determination as to what percentage a taxpayer's household income bears to the poverty level for a family of the size involved shall be made under one of the following methods:

(i) A method under which—

(I) the taxpayer's family size is determined by not taking such individuals into account, and

(II) the taxpayer's household income is equal to the product of the taxpayer's household income (determined without regard to this subsection) and a fraction—

(aa) the numerator of which is the poverty line for the taxpayer's family size determined after application of subclause (I), and

(bb) the denominator of which is the poverty line for the taxpayer's family size determined without regard to subclause (I).

(ii) A comparable method reaching the same result as the method under clause (i).

(3) **SECRETARIAL AUTHORITY.**—The Secretary, in consultation with the Secretary of the Treasury, shall prescribe rules setting forth the methods by which calculations of family size and household income are made for purposes of this subsection. Such rules shall be designed to ensure that the least burden is placed on individuals enrolling in qualified health plans through an Exchange and taxpayers eligible for the credit allowable under this section.

(f) **DEFINITIONS AND SPECIAL RULES.**—In this section:

(1) **IN GENERAL.**—Any term used in this section which is also used in section 36B of the Internal Revenue Code of 1986 shall have the meaning given such term by such section.

(2) **LIMITATIONS ON REDUCTION.**—No cost-sharing reduction shall be allowed under this section with respect to coverage for any month unless the month is a coverage month with respect to which a credit is allowed to the insured (or an applicable taxpayer on behalf of the insured) under section 36B of such Code.

(3) **DATA USED FOR ELIGIBILITY.**—Any determination under this section shall be made on the basis of the taxable year for which the advance determination is made under section 1412 and not the taxable year for which the credit under section 36B of such Code is allowed.

ployer with respect to whom 1 or more employee of the employer were determined to be eligible for the premium tax credit under section 36B of the Internal Revenue Code of 1986 and the cost-sharing reductions under section 1402 because—

(i) the employer did not provide minimum essential coverage; or

(ii) the employer provided such minimum essential coverage but it was determined under section 36B(c)(2)(C) of such Code to either be unaffordable to the employee or not provide the required minimum actuarial value; and

(3) the Secretary of the Treasury makes advance payments of such credit or reductions to the issuers of the qualified health plans in order to reduce the premiums payable by individuals eligible for such credit.

(b) *ADVANCE DETERMINATIONS.*—

(1) *IN GENERAL.*—The Secretary shall provide under the program established under subsection (a) that advance determination of eligibility with respect to any individual shall be made—

(A) during the annual open enrollment period applicable to the individual (or such other enrollment period as may be specified by the Secretary); and

(2) *CHANGES IN CIRCUMSTANCES.*—The Secretary shall provide procedures for making advance determinations on the basis of information other than that described in paragraph (1)(B) in cases where information included with an application form demonstrates substantial changes in income, changes in family size or other household circumstances, change in filing status, the filing of an application for unemployment benefits, or other significant changes affecting eligibility, including—

(A) allowing an individual claiming a decrease of 20 percent or more in income, or filing an application for unemployment benefits, to have eligibility for the credit determined on the basis of household income for a later period or on the basis of the individual's estimate of such income for the taxable year; and

(B) *ISSUER RESPONSIBILITIES.*—An issuer of a qualified health plan receiving an advance payment with respect to an individual enrolled in the plan shall—

(i) reduce the premium charged the insured for any period by the amount of the advance payment for the period;

(ii) notify the Exchange and the Secretary of such reduction;

(iii) include with each billing statement the amount by which the premium for the plan has been reduced by reason of the advance payment; and

(e) **STATE FLEXIBILITY.**—Nothing in this subtitle or the amendments made by this subtitle shall be construed to prohibit a State from making payments to or on behalf of an individual for coverage under a qualified health plan offered through an Exchange that are in addition to any credits or cost-sharing reductions allowable to the individual under this subtitle and such amendments.

SEC. 1413. STREAMLINING OF PROCEDURES FOR ENROLLMENT THROUGH AN EXCHANGE AND STATE MEDICAID, CHIP, AND HEALTH SUBSIDY PROGRAMS.

(a) **IN GENERAL.**—The Secretary shall establish a system meeting the requirements of this section under which residents of each State may apply for enrollment in, receive a determination of eligibility for participation in, and continue participation in, applicable State health subsidy programs. Such system shall ensure that if an individual applying to an Exchange is found through screening to be eligible for medical assistance under the State medicaid plan under title XIX, or eligible for enrollment under a State children's health insurance program (CHIP) under title XXI of such Act, the individual is enrolled for assistance under such plan or program.

(b) **REQUIREMENTS RELATING TO FORMS AND NOTICE.**—

(1) **REQUIREMENTS RELATING TO FORMS.**—

(A) **IN GENERAL.**—The Secretary shall develop and provide to each State a single, streamlined form that—

(B) **STATE AUTHORITY TO ESTABLISH FORM.**—A State may develop and use its own single, streamlined form as an alternative to the form developed under subparagraph (A) if the alternative form is consistent with standards promulgated by the Secretary under this section.

(C) **SUPPLEMENTAL ELIGIBILITY FORMS.**—The Secretary may allow a State to use a supplemental or alternative form in the case of individuals who apply for eligibility that is not determined on the basis of the household income (as defined in section 36B of the Internal Revenue Code of 1986).

(2) **NOTICE.**—The Secretary shall provide that an applicant filing a form under paragraph (1) shall receive notice of eligibility for an applicable State health subsidy program without any need to provide additional information or paperwork unless such information or paperwork is

(c) **REQUIREMENTS RELATING TO ELIGIBILITY BASED ON DATA EXCHANGES.**—

(1) **DEVELOPMENT OF SECURE INTERFACES.**—Each State shall develop for all applicable State health subsidy programs a secure, electronic interface allowing an exchange of data (including information contained in the application forms described in subsection (b)) that allows a determination of eligibility for all such programs based on a single application. Such interface shall be compatible with the method established for data verification under section 1411(c)(4).

(2) **DATA MATCHING PROGRAM.**—Each applicable State health subsidy program shall participate in a data matching arrangement for determining eligibility for participation in the program under paragraph (3) that—

(ii) apply for such assistance—

(B) **EXCEPTION.**—This paragraph shall not apply in circumstances with respect to which the Secretary determines that the administrative and other costs of use of the data matching arrangement under paragraph (2) outweigh its expected gains in accuracy, efficiency, and program participation.

(4) **SECRETARIAL STANDARDS.**—The Secretary shall, after consultation with persons in possession of the data to be matched and representatives of applicable State health subsidy programs, promulgate standards governing the timing, contents, and procedures for data matching described in this subsection. Such standards shall take into account administrative and other costs and the value of data matching to the establishment, verification, and updating of eligibility for applicable State health subsidy programs.

(d) **ADMINISTRATIVE AUTHORITY.**—

(1) **AGREEMENTS.**—Subject to section 1411 and section 6103(l)(21) of the Internal Revenue Code of 1986 and any other requirement providing safeguards of privacy and data integrity, the Secretary may establish model agreements, and enter into agreements, for the sharing of data under this section.

(2) **AUTHORITY OF EXCHANGE TO CONTRACT OUT.**—Nothing in this section shall be construed to—

Subtitle F—Shared Responsibility for Health Care

PART I—INDIVIDUAL RESPONSIBILITY

SEC. 1501. REQUIREMENT TO MAINTAIN MINIMUM ESSENTIAL COVERAGE.

(a) FINDINGS.—Congress makes the following findings:

(1) IN GENERAL.—The individual responsibility requirement provided for in this section (in this subsection referred to as the “requirement”) is commercial and economic in nature, and substantially affects interstate commerce, as a result of the effects described in paragraph (2).

(2) EFFECTS ON THE NATIONAL ECONOMY AND INTERSTATE COMMERCE.—The effects described in this paragraph are the following:

(A) The requirement regulates activity that is commercial and economic in nature: economic and financial decisions about how and when health care is paid for, and when health insurance is purchased.

(B) Health insurance and health care services are a significant part of the national economy. National health spending is projected to increase from \$2,500,000,000,000, or 17.6 percent of the economy, in 2009 to \$4,700,000,000,000 in 2019. Private health insurance spending is projected to be \$854,000,000,000 in 2009, and pays for medical supplies, drugs, and equipment that are shipped in interstate commerce. Since most health insurance is sold by national or regional health insurance companies, health insurance is sold in interstate commerce and claims payments flow through interstate commerce.

(C) The requirement, together with the other provisions of this Act, will add millions of new consumers to the health insurance market, increasing the supply of, and demand for, health care services. According to the Congressional Budget Office, the requirement will increase the number and share of Americans who are insured.

(D) The requirement achieves near-universal coverage by building upon and strengthening the private employer-based health insurance system, which covers 176,000,000 Americans nationwide. In Massachusetts, a similar requirement has strengthened private employer-based coverage: despite the economic downturn, the number of workers offered employer-based coverage has actually increased.

(E) Half of all personal bankruptcies are caused in part by medical expenses. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will improve financial security for families.

(F) Under the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 et seq.), the Public Health Service Act (42 U.S.C. 201 et seq.), and this Act, the Federal Government has a significant role in regulating health insurance which is in interstate commerce.

(G) Under sections 2704 and 2705 of the Public Health Service Act (as added by section 1201 of this Act), if there were no requirement, many individuals would wait to purchase health insurance until they needed care. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will minimize this adverse selection and broaden the health insurance risk pool to include healthy individuals, which will lower health insurance premiums. The requirement is essential to creating effective health insurance markets in which improved health insurance products that are guaranteed issue and do not exclude coverage of pre-existing conditions can be sold.

(H) Administrative costs for private health insurance, which were \$90,000,000,000 in 2006, are 26 to 30 percent of premiums in the current individual and small group markets. By significantly increasing health insurance coverage and the size of purchasing pools, which will increase economies of scale, the requirement, together with the other provisions of this Act, will significantly reduce administrative costs and lower health insurance premiums. The requirement is essential to creating effective health insurance markets that do not require underwriting and eliminate its associated administrative costs.

(3) SUPREME COURT RULING.—In *United States v. South-Eastern Underwriters Association* (322 U.S. 533 (1944)), the Supreme Court of the United States ruled that insurance is interstate commerce subject to Federal regulation.

(b) IN GENERAL.—Subtitle D of the Internal Revenue Code of 1986 is amended by adding at the end the following new chapter:

“CHAPTER 48—MAINTENANCE OF MINIMUM ESSENTIAL COVERAGE

“Sec. 5000A. Requirement to maintain minimum essential coverage.

“SEC. 5000A. REQUIREMENT TO MAINTAIN MINIMUM ESSENTIAL COVERAGE.

“(a) REQUIREMENT TO MAINTAIN MINIMUM ESSENTIAL COVERAGE.—An applicable individual shall for each month beginning after 2013 ensure that the individual, and any dependent of the individual who is an applicable individual, is covered under minimum essential coverage for such month.

“(b) SHARED RESPONSIBILITY PAYMENT.—

SEC. 2406. SENSE OF THE SENATE REGARDING LONG-TERM CARE.

(a) **FINDINGS.**—The Senate makes the following findings:

(1) Nearly 2 decades have passed since Congress seriously considered long-term care reform. The United States Bipartisan Commission on Comprehensive Health Care, also known as the "Pepper Commission", released its "Call for Action" blueprint for health reform in September 1990. In the 20 years since those recommendations were made, Congress has never acted on the report.

(2) In 1999, under the United States Supreme Court's decision in *Olmstead v. L.C.*, 527 U.S. 581 (1999), individuals with disabilities have the right to choose to receive their long-term services and supports in the community, rather than in an institutional setting.

(3) Despite the Pepper Commission and *Olmstead* decision, the long-term care provided to our Nation's elderly and disabled has not improved. In fact, for many, it has gotten far worse.

(4) In 2007, 69 percent of Medicaid long-term care spending for elderly individuals and adults with physical disabilities paid for institutional services. Only 6 states spent 50 percent or more of their Medicaid long-term care dollars on home and community-based services for elderly individuals and adults with physical disabilities while ½ of the States spent less than 25 percent. This disparity continues even though, on average, it is estimated that Medicaid dollars can support nearly 3 elderly individuals and adults with physical disabilities in home and community-based services for every individual in a nursing home. Although every State has chosen to provide certain services under home and community-based waivers, these services are unevenly available within and across States, and reach a small percentage of eligible individuals.

(b) **SENSE OF THE SENATE.**—It is the sense of the Senate that—

(1) during the 111th session of Congress, Congress should address long-term services and supports in a comprehensive way that guarantees elderly and disabled individuals the care they need; and

(2) long term services and supports should be made available in the community in addition to in institutions.

(6) The Secretary and each State selected to participate in the demonstration project shall ensure that the demonstration project does not result in the Medicaid beneficiaries whose care is subject to payment under the demonstration project being provided with less items and services for which medical assistance is provided under the State Medicaid program than the items and services for which medical assistance

would have been provided to such beneficiaries under the State Medicaid program in the absence of the demonstration project.

“SHARED SAVINGS PROGRAM

“SEC. 1899. (a) ESTABLISHMENT.—

“(1) IN GENERAL.—Not later than January 1, 2012, the Secretary shall establish a shared savings program (in this section referred to as the ‘program’) that promotes accountability for a patient population and coordinates items and services under parts A and B, and encourages investment in infrastructure and redesigned care processes for high quality and efficient service delivery. Under such program—

“(A) groups of providers of services and suppliers meeting criteria specified by the Secretary may work together to manage and coordinate care for Medicare fee-for-service beneficiaries through an accountable care organization (referred to in this section as an ‘ACO’); and

“(B) ACOs that meet quality performance standards established by the Secretary are eligible to receive payments for shared savings under subsection (d)(2).

“(b) ELIGIBLE ACOs.—

“(1) IN GENERAL.—Subject to the succeeding provisions of this subsection, as determined appropriate by the Secretary, the following groups of providers of services and suppliers which have established a mechanism for shared governance are eligible to participate as ACOs under the program under this section:

“(A) ACO professionals in group practice arrangements.

“(B) Networks of individual practices of ACO professionals.

“(C) Partnerships or joint venture arrangements between hospitals and ACO professionals.

“(D) Hospitals employing ACO professionals.

“(E) Such other groups of providers of services and suppliers as the Secretary determines appropriate.

“(2) REQUIREMENTS.—An ACO shall meet the following requirements:

“(A) The ACO shall be willing to become accountable for the quality, cost, and overall care of the Medicare fee-for-service beneficiaries assigned to it.

“(B) The ACO shall enter into an agreement with the Secretary to participate in the program for not less than a 3-year period (referred to in this section as the ‘agreement period’).

“(C) The ACO shall have a formal legal structure that would allow the organization to receive and distribute payments for shared savings under subsection (d)(2) to participating providers of services and suppliers.

“(D) The ACO shall include primary care ACO professionals that are sufficient for the number of Medicare fee-for-service beneficiaries assigned to the ACO under subsection (c). At a

minimum, the ACO shall have at least 5,000 such beneficiaries assigned to it under subsection (c) in order to be eligible to participate in the ACO program.

“(E) The ACO shall provide the Secretary with such information regarding ACO professionals participating in the ACO as the Secretary determines necessary to support the assignment of Medicare fee-for-service beneficiaries to an ACO, the implementation of quality and other reporting requirements under paragraph (3), and the determination of payments for shared savings under subsection (d)(2).

“(F) The ACO shall have in place a leadership and management structure that includes clinical and administrative systems.

“(G) The ACO shall define processes to promote evidence-based medicine and patient engagement, report on quality and cost measures, and coordinate care, such as through the use of telehealth, remote patient monitoring, and other such enabling technologies.

“(H) The ACO shall demonstrate to the Secretary that it meets patient-centeredness criteria specified by the Secretary, such as the use of patient and caregiver assessments or the use of individualized care plans.

“(3) QUALITY AND OTHER REPORTING REQUIREMENTS.—

“(A) IN GENERAL.—The Secretary shall determine appropriate measures to assess the quality of care furnished by the ACO, such as measures of—

“(i) clinical processes and outcomes;

“(ii) patient and, where practicable, caregiver experience of care; and

“(iii) utilization (such as rates of hospital admissions for ambulatory care sensitive conditions).

“(B) REPORTING REQUIREMENTS.—An ACO shall submit data in a form and manner specified by the Secretary on measures the Secretary determines necessary for the ACO to report in order to evaluate the quality of care furnished by the ACO. Such data may include care transitions across health care settings, including hospital discharge planning and post-hospital discharge follow-up by ACO professionals, as the Secretary determines appropriate.

“(C) QUALITY PERFORMANCE STANDARDS.—The Secretary shall establish quality performance standards to assess the quality of care furnished by ACOs. The Secretary shall seek to improve the quality of care furnished by ACOs over time by specifying higher standards, new measures, or both for purposes of assessing such quality of care.

“(D) OTHER REPORTING REQUIREMENTS.—The Secretary may, as the Secretary determines appropriate, incorporate reporting requirements and incentive payments related to the physician quality reporting initiative (PQRI) under section 1848, including such requirements and such payments related to electronic prescribing, electronic health records, and other similar initiatives under section 1848, and may use alternative criteria than would otherwise apply under such section for determining whether to make such payments. The incentive payments described in the preceding sentence shall not be taken into consideration when calculating any payments otherwise made under subsection (d).

“(4) NO DUPLICATION IN PARTICIPATION IN SHARED SAVINGS PROGRAMS.—A provider of services or supplier that participates in any of the following shall not be eligible to participate in an ACO under this section:

“(A) A model tested or expanded under section 1115A that involves shared savings under this title, or any other program or demonstration project that involves such shared savings.

“(d) PAYMENTS AND TREATMENT OF SAVINGS.—

“(1) PAYMENTS.—

“(A) IN GENERAL.—Under the program, subject to paragraph (3), payments shall continue to be made to providers of services and suppliers participating in an ACO under the original Medicare fee-for-service program under parts A and B in the same manner as they would otherwise be made except that a participating ACO is eligible to receive payment for shared savings under paragraph (2) if—

“(i) the ACO meets quality performance standards established by the Secretary under subsection (b)(3); and

“(ii) the ACO meets the requirement under subparagraph (B)(i).

“(B) SAVINGS REQUIREMENT AND BENCHMARK.—

“(i) DETERMINING SAVINGS.—In each year of the agreement period, an ACO shall be eligible to receive payment for shared savings under paragraph (2) only if the estimated average per capita Medicare expenditures under the ACO for Medicare fee-for-service beneficiaries for parts A and B services, adjusted for beneficiary characteristics, is at least the percent specified by the Secretary below the applicable benchmark under clause (ii). The Secretary shall determine the appropriate percent described in the preceding sentence to account for normal variation in expenditures under this title, based upon the number of Medicare fee-for-service beneficiaries assigned to an ACO.

“(ii) ESTABLISH AND UPDATE BENCHMARK.—The Secretary shall estimate a benchmark for each agreement period for each ACO using the most recent available 3 years of per-beneficiary expenditures for parts A and B services for Medicare fee-for-service beneficiaries assigned to the ACO. Such benchmark shall be adjusted for beneficiary characteristics and such other factors as the Secretary determines appropriate and updated by the projected absolute amount of growth in national per capita expenditures for parts A and B services under the original Medicare fee-for-service program, as estimated by the Secretary. Such benchmark shall be reset at the start of each agreement period.

“(2) PAYMENTS FOR SHARED SAVINGS.—Subject to performance with respect to the quality performance standards established by the Secretary under subsection (b)(3), if an ACO meets the requirements under paragraph (1), a percent (as determined appropriate by the Secretary) of the difference between such estimated average per capita Medicare expenditures in a year, adjusted for beneficiary characteristics, under the ACO and such benchmark for the ACO may be paid to the ACO as shared savings and the remainder of such difference shall be retained by the program under this title. The Secretary shall establish limits on the total amount of shared savings that may be paid to an ACO under this paragraph.

“(3) MONITORING AVOIDANCE OF AT-RISK PATIENTS.—If the Secretary determines that an ACO has taken steps to avoid patients at risk in order to reduce the likelihood of increasing costs to the ACO the Secretary may impose an appropriate sanction on the ACO, including termination from the program.

“(4) TERMINATION.—The Secretary may terminate an agreement with an ACO if it does not meet the quality performance standards established by the Secretary under subsection (b)(3).

“(e) ADMINISTRATION.—Chapter 35 of title 44, United States Code, shall not apply to the program.

“(f) **WAIVER AUTHORITY.**—The Secretary may waive such requirements of sections 1128A and 1128B and title XVIII of this Act as may be necessary to carry out the provisions of this section.

“(3) the assignment of Medicare fee-for-service beneficiaries to an ACO under subsection (c);

“(4) the determination of whether an ACO is eligible for shared savings under subsection (d)(2) and the amount of such shared savings, including the determination of the estimated average per capita Medicare expenditures under the ACO for Medicare fee-for-service beneficiaries assigned to the ACO and the average benchmark for the ACO under subsection (d)(1)(B);

“(5) the percent of shared savings specified by the Secretary under subsection (d)(2) and any limit on the total amount of shared savings established by the Secretary under such subsection; and

“(6) the termination of an ACO under subsection (d)(4).

(2) by adding at the end the following new subsection:

“(r) ADJUSTMENTS TO MEDICARE DSH PAYMENTS.—

“(1) EMPIRICALLY JUSTIFIED DSH PAYMENTS.—For fiscal year 2015 and each subsequent fiscal year, instead of the amount of disproportionate share hospital payment that would otherwise be made under subsection (d)(5)(F) to a subsection (d) hospital for the fiscal year, the Secretary shall pay to the subsection (d) hospital 25 percent of such amount (which represents the empirically justified amount for such payment, as determined by the Medicare Payment Advisory Commission in its March 2007 Report to the Congress).

“(2) ADDITIONAL PAYMENT.—In addition to the payment made to a subsection (d) hospital under paragraph (1), for fiscal year 2015 and each subsequent fiscal year, the Secretary shall pay to such subsection (d) hospitals an additional amount equal to the product of the following factors:

“(A) FACTOR ONE.—A factor equal to the difference between—

“(i) the aggregate amount of payments that would be made to subsection (d) hospitals under subsection (d)(5)(F) if this subsection did not apply for such fiscal year (as estimated by the Secretary); and

“(ii) the aggregate amount of payments that are made to subsection (d) hospitals under paragraph (1) for such fiscal year (as so estimated).

“(B) FACTOR TWO.—

“(i) FISCAL YEARS 2015, 2016, AND 2017.—For each of fiscal years 2015, 2016, and 2017, a factor equal to 1 minus the percent change (divided by 100) in the percent of individuals under the age of 65 who are uninsured, as determined by comparing the percent of such individuals—

“(I) who are uninsured in 2012, the last year before coverage expansion under the Patient Protection and Affordable Care Act (as calculated by the Secretary based on the most recent estimates available from the Director of the Congressional Budget Office before a vote in either House on such Act that, if determined in the affirmative, would clear such Act for enrollment); and

“(II) who are uninsured in the most recent period for which data is available (as so calculated).

“(ii) 2018 AND SUBSEQUENT YEARS.—For fiscal year 2018 and each subsequent fiscal year, a factor equal to 1 minus the percent change (divided by 100) in the percent of individuals who are uninsured, as determined by comparing the percent of individuals—

“(I) who are uninsured in 2012 (as estimated by the Secretary, based on data from the Census Bureau or other sources the Secretary determines appropriate, and certified by the Chief Actuary of the Centers for Medicare & Medicaid Services); and

“(II) who are uninsured in the most recent period for which data is available (as so estimated and certified).

“(C) FACTOR THREE.—A factor equal to the percent, for each subsection (d) hospital, that represents the quotient of—

“(i) the amount of uncompensated care for such hospital for a period selected by the Secretary (as estimated by the Secretary, based on appropriate data (including, in the case where the Secretary determines that alternative data is available which is a better proxy for the costs of subsection (d) hospitals for treating the uninsured, the use of such alternative data)); and

“(ii) the aggregate amount of uncompensated care for all subsection (d) hospitals that receive a payment under this subsection for such period (as so estimated, based on such data).

“(3) LIMITATIONS ON REVIEW.—There shall be no administrative or judicial review under sec-

tion 1869, section 1878, or otherwise of the following:

"(B) **ADVISORY REPORTS.**—Beginning January 15, 2014, the Board may develop and submit to Congress advisory reports on matters related to the Medicare program, regardless of whether or not the Board submitted a proposal for such year. Such a report may, for years prior to 2020, include recommendations regarding improvements to payment systems for providers of services and suppliers who are not otherwise subject to the scope of the Board's recommendations in a proposal under this section. Any advisory report submitted under this subparagraph shall not be subject to the rules for congressional consideration under subsection (d).

"(2) **PROPOSALS.**—

"(A) **REQUIREMENTS.**—Each proposal submitted under this section in a proposal year shall meet each of the following requirements:

"(i) If the Chief Actuary of the Centers for Medicare & Medicaid Services has made a determination under paragraph (7)(A) in the determination year, the proposal shall include recommendations so that the proposal as a whole (after taking into account recommendations under clause (v)) will result in a net reduction in total Medicare program spending in the implementation year that is at least equal to the applicable savings target established under paragraph (7)(B) for such implementation year. In determining whether a proposal meets the requirement of the preceding sentence, reductions in Medicare program spending during the 3-month period immediately preceding the implementation year shall be counted to the extent

that such reductions are a result of the implementation of recommendations contained in the proposal for a change in the payment rate for an item or service that was effective during such period pursuant to subsection (e)(2)(A).

“(ii) The proposal shall not include any recommendation to ration health care, raise revenues or Medicare beneficiary premiums under section 1818, 1818A, or 1839, increase Medicare beneficiary cost-sharing (including deductibles, coinsurance, and copayments), or otherwise restrict benefits or modify eligibility criteria.

“(iii) In the case of proposals submitted prior to December 31, 2018, the proposal shall not include any recommendation that would reduce payment rates for items and services furnished, prior to December 31, 2019, by providers of services (as defined in section 1861(u)) and suppliers (as defined in section 1861(d)) scheduled, pursuant to the amendments made by section 3401 of the Patient Protection and Affordable Care Act, to receive a reduction to the inflationary payment updates of such providers of services and suppliers in excess of a reduction due to productivity in a year in which such recommendations would take effect.

“(iv) As appropriate, the proposal shall include recommendations to reduce Medicare payments under parts C and D, such as reductions in direct subsidy payments to Medicare Advantage and prescription drug plans specified under paragraph (1) and (2) of section 1860D–15(a) that are related to administrative expenses (including profits) for basic coverage, denying high bids or removing high bids for prescription drug coverage from the calculation of the national average monthly bid amount under section 1860D–13(a)(4), and reductions in payments to Medicare Advantage plans under clauses (i) and (ii) of section 1853(a)(1)(B) that are related to administrative expenses (including profits) and performance bonuses for Medicare Advantage plans under section 1853(n). Any such recommendation shall not affect the base beneficiary premium percentage specified under 1860D–13(a).

“(v) The proposal shall include recommendations with respect to administrative funding for the Secretary to carry out the recommendations contained in the proposal.

“(vi) The proposal shall only include recommendations related to the Medicare program.

“(B) ADDITIONAL CONSIDERATIONS.—In developing and submitting each proposal under this section in a proposal year, the Board shall, to the extent feasible—

“(iii) include recommendations that target reductions in Medicare program spending to sources of excess cost growth;

“(iv) consider the effects on Medicare beneficiaries of changes in payments to providers of services (as defined in section 1861(u)) and suppliers (as defined in section 1861(d));

“(v) consider the effects of the recommendations on providers of services and suppliers with actual or projected negative cost margins or payment updates; and

“(vi) consider the unique needs of Medicare beneficiaries who are dually eligible for Medicare and the Medicaid program under title XIX.

“(C) NO INCREASE IN TOTAL MEDICARE PROGRAM SPENDING.—Each proposal submitted

under this section shall be designed in such a manner that implementation of the recommendations contained in the proposal would not be expected to result, over the 10-year period starting with the implementation year, in any increase in the total amount of net Medicare program spending relative to the total amount of net Medicare program spending that would have occurred absent such implementation.

“(D) CONSULTATION WITH MEDPAC.—The Board shall submit a draft copy of each proposal to be submitted under this section to the Medicare Payment Advisory Commission established under section 1805 for its review. The Board shall submit such draft copy by not later than September 1 of the determination year.

“(II) a year in which the Chief Actuary of the Centers for Medicare & Medicaid Services makes a determination in the determination year that the projected percentage increase (if any) for the medical care expenditure category of the Consumer Price Index for All Urban Consumers (United States city average) for the implementation year is less than the projected percentage increase (if any) in the Consumer Price Index for All Urban Consumers (all items; United States city average) for such implementation year; or

“(ii) REQUIREMENT.—The projection under clause (i) shall—

“(I) to the extent that there is projected to be a negative update to the single conversion factor applicable to payments for physicians’ services under section 1848(d) furnished in the proposal year or the implementation year, assume that such update for such services is 0 percent rather than the negative percent that would otherwise apply; and

“(II) take into account any delivery system reforms or other payment changes that have been enacted or published in final rules but not yet implemented as of the making of such calculation.

“(C) MEDICARE PER CAPITA TARGET GROWTH RATE.—For purposes of this section, the Medicare per capita target growth rate for an implementation year shall be calculated as the projected 5-year average (ending with such year) percentage increase in—

“SEC. 1182. (a) The Secretary may only use evidence and findings from research conducted under section 1181 to make a determination regarding coverage under title XVIII if such use is through an iterative and transparent process which includes public comment and considers the effect on subpopulations.

“(b) Nothing in section 1181 shall be construed as—

“(1) superceding or modifying the coverage of items or services under title XVIII that the Secretary determines are reasonable and necessary under section 1862(l)(1); or

“(2) authorizing the Secretary to deny coverage of items or services under such title solely on the basis of comparative clinical effectiveness research.

“(c)(1) The Secretary shall not use evidence or findings from comparative clinical effectiveness research conducted under section 1181 in determining coverage, reimbursement, or incentive programs under title XVIII in a manner that treats extending the life of an elderly, disabled, or terminally ill individual as of lower value than extending the life of an individual who is younger, nondisabled, or not terminally ill.

“(2) Paragraph (1) shall not be construed as preventing the Secretary from using evidence or findings from such comparative clinical effectiveness research in determining coverage, reimbursement, or incentive programs under title

XVIII based upon a comparison of the difference in the effectiveness of alternative treatments in extending an individual’s life due to the individual’s age, disability, or terminal illness.

“(d)(1) The Secretary shall not use evidence or findings from comparative clinical effectiveness research conducted under section 1181 in determining coverage, reimbursement, or incentive programs under title XVIII in a manner that precludes, or with the intent to discourage, an individual from choosing a health care treatment based on how the individual values the tradeoff between extending the length of their life and the risk of disability.

“(2)(A) Paragraph (1) shall not be construed to—

“(i) limit the application of differential copayments under title XVIII based on factors such as cost or type of service; or

“(ii) prevent the Secretary from using evidence or findings from such comparative clinical effectiveness research in determining coverage, reimbursement, or incentive programs under such title based upon a comparison of the difference in the effectiveness of alternative health care treatments in extending an individual’s life due to that individual’s age, disability, or terminal illness.

“(3) Nothing in the provisions of, or amendments made by the Patient Protection and Affordable Care Act, shall be construed to limit comparative clinical effectiveness research or any other research, evaluation, or dissemination of information concerning the likelihood that a health care treatment will result in disability.

“(e) The Patient-Centered Outcomes Research Institute established under section 1181(b)(1) shall not develop or employ a dollars-per-quality adjusted life year (or similar measure that discounts the value of a life because of an individual’s disability) as a threshold to establish what type of health care is cost effective or recommended. The Secretary shall not utilize such an adjusted life year (or such a similar measure) as a threshold to determine coverage, reimbursement, or incentive programs under title XVIII.”.

TITLE VII—IMPROVING ACCESS TO INNOVATIVE MEDICAL THERAPIES

Subtitle A—Biologics Price Competition and Innovation

SEC. 7001. SHORT TITLE.

(a) IN GENERAL.—This subtitle may be cited as the “Biologics Price Competition and Innovation Act of 2009”.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that a biosimilars pathway balancing

innovation and consumer interests should be established.

SEC. 7002. APPROVAL PATHWAY FOR BIOSIMILAR BIOLOGICAL PRODUCTS.

(a) LICENSURE OF BIOLOGICAL PRODUCTS AS BIOSIMILAR OR INTERCHANGEABLE.—Section 351 of the Public Health Service Act (42 U.S.C. 262) is amended—

(1) in subsection (a)(1)(A), by inserting “under this subsection or subsection (k)” after “biologics license”; and

(2) by adding at the end the following:

“(k) LICENSURE OF BIOLOGICAL PRODUCTS AS BIOSIMILAR OR INTERCHANGEABLE.—

“(1) IN GENERAL.—Any person may submit an application for licensure of a biological product under this subsection.

“(2) CONTENT.—

“(A) IN GENERAL.—

“(i) REQUIRED INFORMATION.—An application submitted under this subsection shall include information demonstrating that—

“(I) the biological product is biosimilar to a reference product based upon data derived from—

“(aa) analytical studies that demonstrate that the biological product is highly similar to the reference product notwithstanding minor differences in clinically inactive components;

“(bb) animal studies (including the assessment of toxicity); and

“(cc) a clinical study or studies (including the assessment of immunogenicity and pharmacokinetics or pharmacodynamics) that are sufficient to demonstrate safety, purity, and potency in 1 or more appropriate conditions of use for which the reference product is licensed and intended to be used and for which licensure is sought for the biological product;

“(II) the biological product and reference product utilize the same mechanism or mechanisms of action for the condition or conditions of use prescribed, recommended, or suggested in the proposed labeling, but only to the extent the mechanism or mechanisms of action are known for the reference product;

“(III) the condition or conditions of use prescribed, recommended, or suggested in the labeling proposed for the biological product have been previously approved for the reference product;

“(IV) the route of administration, the dosage form, and the strength of the biological product are the same as those of the reference product; and

“(V) the facility in which the biological product is manufactured, processed, packed, or held meets standards designed to assure that the biological product continues to be safe, pure, and potent.

“(ii) DETERMINATION BY SECRETARY.—The Secretary may determine, in the Secretary’s discretion, that an element described in clause (i)(I) is unnecessary in an application submitted under this subsection.

“(iii) ADDITIONAL INFORMATION.—An application submitted under this subsection—

“(I) shall include publicly-available information regarding the Secretary’s previous determination that the reference product is safe, pure, and potent; and

“(II) may include any additional information in support of the application, including publicly-available information with respect to the reference product or another biological product.

“(B) INTERCHANGEABILITY.—An application (or a supplement to an application) submitted under this subsection may include information demonstrating that the biological product meets the standards described in paragraph (4).

“(3) EVALUATION BY SECRETARY.—Upon review of an application (or a supplement to an application) submitted under this subsection, the Secretary shall license the biological product under this subsection if—

“(A) the Secretary determines that the information submitted in the application (or the supplement) is sufficient to show that the biological product—

“(i) is biosimilar to the reference product; or

“(ii) meets the standards described in paragraph (4), and therefore is interchangeable with the reference product; and

“(B) the applicant (or other appropriate person) consents to the inspection of the facility that is the subject of the application, in accordance with subsection (c).

“(4) SAFETY STANDARDS FOR DETERMINING INTERCHANGEABILITY.—Upon review of an application submitted under this subsection or any supplement to such application, the Secretary shall determine the biological product to be interchangeable with the reference product if the Secretary determines that the information submitted in the application (or a supplement to such application) is sufficient to show that—

“(A) the biological product—

“(i) is biosimilar to the reference product; and

“(ii) can be expected to produce the same clinical result as the reference product in any given patient; and

“(B) for a biological product that is administered more than once to an individual, the risk in terms of safety or diminished efficacy of alternating or switching between use of the biological product and the reference product is not greater than the risk of using the reference product without such alternation or switch.

“(5) GENERAL RULES.—

“(A) ONE REFERENCE PRODUCT PER APPLICATION.—A biological product, in an application submitted under this subsection, may not be evaluated against more than 1 reference product.

“(B) REVIEW.—An application submitted under this subsection shall be reviewed by the division within the Food and Drug Administration that is responsible for the review and approval of the application under which the reference product is licensed.

“(C) RISK EVALUATION AND MITIGATION STRATEGIES.—The authority of the Secretary with respect to risk evaluation and mitigation strategies under the Federal Food, Drug, and Cosmetic Act shall apply to biological products licensed under this subsection in the same manner as such authority applies to biological products licensed under subsection (a).

“(6) EXCLUSIVITY FOR FIRST INTERCHANGEABLE BIOLOGICAL PRODUCT.—Upon review of an application submitted under this subsection relying on the same reference product for which a prior biological product has received a determination of interchangeability for any condition of use, the Secretary shall not make a determination under paragraph (4) that the second or subsequent biological product is interchangeable for any condition of use until the earlier of—

“(A) 1 year after the first commercial marketing of the first interchangeable biosimilar biological product to be approved as interchangeable for that reference product;

“(B) 18 months after—

“(i) a final court decision on all patents in suit in an action instituted under subsection (l)(6) against the applicant that submitted the application for the first approved interchangeable biosimilar biological product; or

“(ii) the dismissal with or without prejudice of an action instituted under subsection (l)(6) against the applicant that submitted the application for the first approved interchangeable biosimilar biological product; or

“(C)(i) 42 months after approval of the first interchangeable biosimilar biological product if the applicant that submitted such application has been sued under subsection (l)(6) and such litigation is still ongoing within such 42-month period; or

“(ii) 18 months after approval of the first interchangeable biosimilar biological product if the applicant that submitted such application has not been sued under subsection (l)(6).

For purposes of this paragraph, the term ‘final court decision’ means a final decision of a court from which no appeal (other than a petition to the United States Supreme Court for a writ of certiorari) has been or can be taken.

“(7) EXCLUSIVITY FOR REFERENCE PRODUCT.—

“(A) EFFECTIVE DATE OF BIOSIMILAR APPLICATION APPROVAL.—Approval of an application under this subsection may not be made effective by the Secretary until the date that is 12 years after the date on which the reference product was first licensed under subsection (a).

“(B) FILING PERIOD.—An application under this subsection may not be submitted to the Secretary until the date that is 4 years after the date on which the reference product was first licensed under subsection (a).

“(C) FIRST LICENSURE.—Subparagraphs (A) and (B) shall not apply to a license for or approval of—

“(i) a supplement for the biological product that is the reference product; or

“(ii) a subsequent application filed by the same sponsor or manufacturer of the biological product that is the reference product (or a licensor, predecessor in interest, or other related entity) for—

“(I) a change (not including a modification to the structure of the biological product) that results in a new indication, route of administration, dosing schedule, dosage form, delivery system, delivery device, or strength; or

“(II) a modification to the structure of the biological product that does not result in a change in safety, purity, or potency.

“(8) GUIDANCE DOCUMENTS.—

“(A) IN GENERAL.—The Secretary may, after opportunity for public comment, issue guidance in accordance, except as provided in subparagraph (B)(i), with section 701(h) of the Federal Food, Drug, and Cosmetic Act with respect to the licensure of a biological product under this subsection. Any such guidance may be general or specific.

“(i) IN GENERAL.—The Secretary shall provide the public an opportunity to comment on any proposed guidance issued under subparagraph (A) before issuing final guidance.

“(ii) INPUT REGARDING MOST VALUABLE GUIDANCE.—The Secretary shall establish a process through which the public may provide the Secretary with input regarding priorities for issuing guidance.

“(C) NO REQUIREMENT FOR APPLICATION CONSIDERATION.—The issuance (or non-issuance) of guidance under subparagraph (A) shall not preclude the review of, or action on, an application submitted under this subsection.

“(D) REQUIREMENT FOR PRODUCT CLASS-SPECIFIC GUIDANCE.—If the Secretary issues product class-specific guidance under subparagraph (A), such guidance shall include a description of—

“(i) the criteria that the Secretary will use to determine whether a biological product is highly similar to a reference product in such product class; and

“(ii) the criteria, if available, that the Secretary will use to determine whether a biological product meets the standards described in paragraph (4).

“(E) CERTAIN PRODUCT CLASSES.—

“(i) GUIDANCE.—The Secretary may indicate in a guidance document that the science and experience, as of the date of such guidance, with respect to a product or product class (not including any recombinant protein) does not allow approval of an application for a license as provided under this subsection for such product or product class.

“(ii) MODIFICATION OR REVERSAL.—The Secretary may issue a subsequent guidance document under subparagraph (A) to modify or reverse a guidance document under clause (i).

“(iii) NO EFFECT ON ABILITY TO DENY LICENSE.—Clause (i) shall not be construed to require the Secretary to approve a product with respect to which the Secretary has not indicated in a guidance document that the science and experience, as described in clause (i), does not allow approval of such an application.

“(l) PATENTS.—

“(1) CONFIDENTIAL ACCESS TO SUBSECTION (k) APPLICATION.—

“(A) APPLICATION OF PARAGRAPH.—Unless otherwise agreed to by a person that submits an application under subsection (k) (referred to in this subsection as the ‘subsection (k) applicant’) and the sponsor of the application for the reference product (referred to in this subsection as the ‘reference product sponsor’), the provisions of this paragraph shall apply to the exchange of information described in this subsection.

“(iii) PATENT OWNER ACCESS.—A representative of the owner of a patent exclusively licensed to a reference product sponsor with respect to the reference product and who has retained a right to assert the patent or participate in litigation concerning the patent may be provided the confidential information, provided that the representative informs the reference product sponsor and the subsection (k) applicant of his or her agreement to be subject to the confidentiality provisions set forth in this paragraph, including those under clause (ii).

“(C) LIMITATION ON DISCLOSURE.—No person that receives confidential information pursuant to subparagraph (B) shall disclose any confidential information to any other person or entity, including the reference product sponsor employees, outside scientific consultants, or other outside counsel retained by the reference product sponsor, without the prior written consent of the subsection (k) applicant, which shall not be unreasonably withheld.

“(D) USE OF CONFIDENTIAL INFORMATION.—Confidential information shall be used for the sole and exclusive purpose of determining, with respect to each patent assigned to or exclusively licensed by the reference product sponsor, whether a claim of patent infringement could reasonably be asserted if the subsection (k) applicant engaged in the manufacture, use, offering for sale, sale, or importation into the United States of the biological product that is the subject of the application under subsection (k).

“(E) OWNERSHIP OF CONFIDENTIAL INFORMATION.—The confidential information disclosed under this paragraph is, and shall remain, the property of the subsection (k) applicant. “(F) EFFECT OF INFRINGEMENT ACTION.—In the event that the reference product sponsor files a patent infringement suit, the use of confidential information shall continue to be governed by the terms of this paragraph until such time as a court enters a protective order regarding the information. Upon entry of such order, the subsection (k) applicant may redesignate confidential information in accordance with the terms of that order. No confidential information shall be included in any publicly-available complaint or other pleading. In the event that the reference product sponsor does not file an infringement action by the date specified in paragraph (6), the reference product sponsor shall return or destroy all confidential information received under this paragraph, provided that if the reference product sponsor opts to destroy such information, it will confirm destruction in writing to the subsection (k) applicant.

“(G) RULE OF CONSTRUCTION.—Nothing in this paragraph shall be construed—

“(i) as an admission by the subsection (k) applicant regarding the validity, enforceability, or infringement of any patent; or

“(ii) as an agreement or admission by the subsection (k) applicant with respect to the competency, relevance, or materiality of any confidential information.

“(H) EFFECT OF VIOLATION.—The disclosure of any confidential information in violation of this paragraph shall be deemed to cause the subsection (k) applicant to suffer irreparable harm for which there is no adequate legal remedy and the court shall consider immediate injunctive relief to be an appropriate and necessary remedy for any violation or threatened violation of this paragraph.

“(2) SUBSECTION (k) APPLICATION INFORMATION.—Not later than 20 days after the Secretary notifies the subsection (k) applicant that the application has been accepted for review, the subsection (k) applicant—

(2) in paragraph (1), as so designated, by inserting “protein (except any chemically synthesized polypeptide),” after “allergenic product,”; and

(3) by adding at the end the following:

“(2) The term ‘biosimilar’ or ‘biosimilarity’, in reference to a biological product that is the subject of an application under subsection (k), means—

“(E) PENALTY FOR REENROLLMENT AFTER 5-YEAR LAPSE.—In the case of an individual who reenrolls in the CLASS program after the end of the 5-year period described in subparagraph (C)(ii), the monthly premium required for the individual shall be the age-adjusted premium that would be applicable to an initially enrolling individual who is the same age as the reenrolling individual, increased by the greater of—

“(i) an amount that the Secretary determines is actuarially sound for each month that occurs during the period that begins with the first month for which the individual failed to pay the monthly premium required to maintain the individual's enrollment in the CLASS program and ends with the month preceding the month in which the reenrollment is effective; or

“(ii) 1 percent of the applicable age-adjusted premium for each such month occurring in such period.

(i) RECAPTURE OF EXCESSIVE GRANT AMOUNTS.—If the amount of a grant made under this subsection exceeds the amount allowable as a grant under this subsection, such excess shall be recaptured under subparagraph (A) as if the investment to which such excess portion of the grant relates had ceased to be a qualified investment immediately after such grant was made.

SEC. 10106. AMENDMENTS TO SUBTITLE F.

(a) Section 1501(a)(2) of this Act is amended to read as follows:

“(2) EFFECTS ON THE NATIONAL ECONOMY AND INTERSTATE COMMERCE.—The effects described in this paragraph are the following:

“(A) The requirement regulates activity that is commercial and economic in nature: economic and financial decisions about how and when health care is paid for, and when health insurance is purchased. In the absence of the requirement, some individuals would make an economic and financial decision to forego health insurance coverage and attempt to self-insure, which increases financial risks to households and medical providers.

“(B) Health insurance and health care services are a significant part of the national economy. National health spending is projected to increase from \$2,500,000,000,000, or 17.6 percent of the economy, in 2009 to \$4,700,000,000,000 in 2019. Private health insurance spending is projected to be \$854,000,000,000 in 2009, and pays for medical supplies, drugs, and equipment that are shipped in interstate commerce. Since most health insurance is sold by national or regional health insurance companies, health insurance is sold in interstate commerce and claims payments flow through interstate commerce.

“(C) The requirement, together with the other provisions of this Act, will add millions of new consumers to the health insurance market, increasing the supply of, and demand for, health care services, and will increase the number and share of Americans who are insured.

“(D) The requirement achieves near-universal coverage by building upon and strengthening the private employer-based health insurance system, which covers 176,000,000 Americans nationwide. In Massachusetts, a similar require-

ment has strengthened private employer-based coverage: despite the economic downturn, the number of workers offered employer-based coverage has actually increased.

“(E) The economy loses up to \$207,000,000,000 a year because of the poorer health and shorter lifespan of the uninsured. By significantly reducing the number of the uninsured, the requirement, together with the other provisions of this Act, will significantly reduce this economic cost.

“(F) The cost of providing uncompensated care to the uninsured was \$43,000,000,000 in 2008. To pay for this cost, health care providers pass on the cost to private insurers, which pass on the cost to families. This cost-shifting increases family premiums by on average over \$1,000 a year. By significantly reducing the number of the uninsured, the requirement, together with the other provisions of this Act, will lower health insurance premiums.

“(G) 62 percent of all personal bankruptcies are caused in part by medical expenses. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will improve financial security for families.

“(H) Under the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 et seq.), the Public Health Service Act (42 U.S.C. 201 et seq.), and this Act, the Federal Government has a significant role in regulating health insurance. The requirement is an essential part of this larger regulation of economic activity, and the absence of the requirement would undercut Federal regulation of the health insurance market.

“(I) Under sections 2704 and 2705 of the Public Health Service Act (as added by section 1201 of this Act), if there were no requirement, many individuals would wait to purchase health insurance until they needed care. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will minimize this adverse selection and broaden the health insurance risk pool to include healthy individuals, which will lower health insurance premiums. The requirement is essential to creating effective health insurance markets in which improved health insurance products that are guaranteed issue and do not exclude coverage of pre-existing conditions can be sold.

“(J) Administrative costs for private health insurance, which were \$90,000,000,000 in 2006, are 26 to 30 percent of premiums in the current individual and small group markets. By significantly increasing health insurance coverage and the size of purchasing pools, which will increase economies of scale, the requirement, together with the other provisions of this Act, will significantly reduce administrative costs and lower health insurance premiums. The requirement is essential to creating effective health insurance markets that do not require underwriting and eliminate its associated administrative costs.”.

(b)(1) Section 5000A(b)(1) of the Internal Revenue Code of 1986, as added by section 1501(b) of this Act, is amended to read as follows:

“(1) IN GENERAL.—If a taxpayer who is an applicable individual, or an applicable individual for whom the taxpayer is liable under paragraph (3), fails to meet the requirement of subsection (a) for 1 or more months, then, except as provided in subsection (e), there is hereby imposed on the taxpayer a penalty with respect to such failures in the amount determined under subsection (c).”.

“(B) an amount equal to the national average premium for qualified health plans which have a bronze level of coverage, provide coverage for the applicable family size involved, and are offered through Exchanges for plan years beginning in the calendar year with or within which the taxable year ends.

“(2) MONTHLY PENALTY AMOUNTS.—For purposes of paragraph (1)(A), the monthly penalty amount with respect to any taxpayer for any month during which any failure described in subsection (b)(1) occurred is an amount equal to 1/12 of the greater of the following amounts:

“(A) FLAT DOLLAR AMOUNT.—An amount equal to the lesser of—

“(i) the sum of the applicable dollar amounts for all individuals with respect to whom such failure occurred during such month, or

“(ii) 300 percent of the applicable dollar amount (determined without regard to paragraph (3)(C)) for the calendar year with or within which the taxable year ends.

“(i) 0.5 percent for taxable years beginning in 2014.

“(ii) 1.0 percent for taxable years beginning in 2015.

“(iii) 2.0 percent for taxable years beginning after 2015.”.

“(1) IN GENERAL.—In the case of any applicable large employer which requires an extended waiting period to enroll in any minimum essential coverage under an employer-sponsored plan (as defined in section 5000A(f)(2)), there is hereby imposed on the employer an assessable payment of \$600 for each full-time employee of the employer to whom the extended waiting period applies.

The motion to lay on the table was agreed to.

Mr. KYL. Mr. President, I ask unanimous consent that two newspaper articles be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FLAWED AID FOR LONG-TERM CARE—A PIECE OF HEALTH REFORM WITH TOO MUCH FINANCIAL RISK

An estimated 10 million elderly and disabled Americans need some sort of long-term care and help with the tasks of daily living. That number will grow as America ages. But the only federal program that pays for such services is Medicaid: Individuals who need long-term care have to spend down their assets to become poor enough to qualify. So does it make sense to establish a federal program under which people could buy long-term care insurance? Does it make sense to do this within the context of health reform? The House and Senate proposals contain such a program. We are sympathetic to the need but have doubts about its advisability.

The program, known as the Community Living Assistance Services and Supports ((CLASS) Act, would be an innovative, voluntary insurance program run by the federal government. Employers could choose to have workers automatically enrolled unless they opt out, and premiums would be deducted from their paychecks. After paying in for five years, they would be entitled, if they become disabled, to a cash benefit—at least \$50 a day—to pay for the non-medical services they need to remain at home rather than going to a nursing home. The premiums and benefits are required to be set at a level that will ensure the program is actuarially sound for 75 years.

Sounds good, yet there are serious concerns about whether the program will work—or whether, because of low participation rates that would leave it mostly enrolling sicker people, it will end up having to set premiums so high or offer benefits so skimpy

that lawmakers will be moved to bail it out. The Obama administration says not. “We’re entirely persuaded that reasonable premiums, solid participation rates and financial solvency over the 75-year period can be maintained.” Richard Frank, deputy assistant secretary for the Office of Disability, Aging and Long-Term Care Policy at the Department of Health and Human Services, told a Kaiser Family Foundation conference.

But both the Congressional Budget Office and the chief actuary for the Medicare program have expressed misgivings. The Medicare actuary, Richard S. Foster, cited “a very serious risk”: Adverse selection—sicker people signing up for the program and the healthier staying away—“would make the CLASS program unsustainable.” He said that even beginning premiums would have to be \$240 a month. Likewise, CBO director Douglas W. Elmendorf warned that “the CLASS program could be subject to considerable financial risk in the future if it were unable to attract a sufficiently healthy group of enrollees.”

There are already enough risks and uncertainties in health reform. Long-term care is an important topic, but it is one that deserves more careful scrutiny than has taken place in the context of the broader health-reform debate.

[From the Washington Post, Dec. 23, 2009]

YES, IT’S ALL ABOUT HIM

(Robert Samuelson)

Barack Obama’s quest for historic health-care legislation has turned into a parody of leadership. We usually associate presidential leadership with the pursuit of goals that, though initially unpopular, serve America’s long-term interests. Obama has reversed this. He’s championing increasingly unpopular legislation that threatens the country’s long-term interests. “This isn’t about me,” he likes to say, “I have great health insurance.” But of course, it is about him: about the legacy he covets as the president who achieved “universal” health insurance. He’ll be disappointed.

Even if Congress passes legislation—a good bet—the finished product will fall far short of Obama’s extravagant promises. It will not cover everyone. It will not control costs. It will worsen the budget outlook. It will lead to higher taxes. It will disrupt how, or whether, companies provide insurance for their workers. As the real-life (as opposed to rhetorical) consequences unfold, they will rebut Obama’s claim that he has “solved” the health-care problem. His reputation will suffer.

It already has. Despite Obama’s eloquence and command of the airwaves, public suspicions are rising. In April, 57 percent of Americans approved his “handling of health care” and 29 percent disapproved, reports the Post-ABC News poll; in the latest survey, 44 percent approved and 53 percent disapproved. About half worried that their care would deteriorate and that health costs would rise.

These fears are well-grounded. The various health-care proposals represent atrocious legislation. To be sure, they would provide insurance to 30 million or more Americans by 2019. People would enjoy more security. But even these gains must be qualified. Some of the newly insured will get healthier, but how many and by how much is unclear. The uninsured now receive 50 to 70 percent as much care as the insured. The administration argues that today’s system has massive waste. If so, greater participation in the waste by the newly insured may not make them much better off.

The remaining uninsured may also exceed estimates. Under the Senate bill, they would total 24 million in 2019, reckons Richard Foster, chief actuary of the Centers for Medicare & Medicaid Services. But a wild card is immigration. From 1999 to 2008, about 60 percent of the increase in the uninsured occurred among Hispanics. That was related to immigrants and their children (many American-born). Most illegal immigrants aren't covered by Obama's proposal. If we don't curb immigration of the poor and unskilled—people who can't afford insurance—Obama's program will be less effective and more expensive than estimated. Hardly anyone mentions immigrants' impact, because it seems insensitive.

Meanwhile, the health-care proposals would impose substantial costs. Remember: The country already faces huge increases in federal spending and taxes or deficits because an aging population will receive more Social Security and Medicare. Projections the Congressional Budget Office made in 2007 suggested that federal spending might rise almost 50 percent by 2030 as a share of the economy (gross domestic product). Since that estimate, the recession and massive deficits have further bloated the national debt.

Obama's plan might add almost an additional \$1 trillion in spending over a decade—and more later. Even if this is fully covered, as Obama contends, by higher taxes and cuts in Medicare reimbursements, this revenue could have been used to cut the existing deficits. But the odds are that the new spending isn't fully covered, because Congress might reverse some Medicare reductions before they take effect. Projected savings seem “unrealistic” says Foster. Similarly, the legislation creates a voluntary long-term care insurance program that's supposedly paid by private premiums. Foster suspects it's “unsustainable,” suggesting a need for big federal subsidies.

Obama's overhaul would also change how private firms insure workers. Perhaps 18 million workers could lose coverage and 16 million gain it, as companies adapt to new regulations and subsidies, estimates the Levin Group, a consulting firm. Private insurers argue that premiums in the individual and small-group markets, where many workers would end up, might rise an extra 25 to 50 percent over a decade. The administration and the CBO disagree. The dispute underlines the bills' immense uncertainties. As for cost control, even generous estimates have health spending growing faster than the economy. Changing that is the first imperative of sensible policy.

So Obama's plan amounts to this: partial coverage of the uninsured; modest improvements (possibly) in their health; sizable budgetary costs worsening a bleak outlook; significant, unpredictable changes in insurance markets; weak spending control. This is a bad bargain. Health benefits are overstated, long-term economic costs understated. The country would be the worse for this legislation's passage. What it's become is an exercise in political symbolism: Obama's self-indulgent crusade to seize the liberal holy grail of “universal coverage.” What it's not is leadership.

Mr. ENSIGN. Mr. President, I really hoped that this day would not come. I am not the only one. The American public is not behind the bill that we voted on. For good reason. I fear that when this effort is written about in history books, it will represent a time

when our Nation took a turn for the worse—when we were presented with two paths, but the wrong path was chosen.

There is a term that originated with television critics called “jumping the shark.” It refers to a plot or character twist that pretty much throws off the balance of the show. The show is never the same and usually heads downhill after that. I believe that this health care bill will be seen as the moment the Democrats jumped the shark for our country.

There have been many pieces of bad legislation leading up to this—obscene amounts of taxpayer money being used to grow the government like never before. But this bill, this health care reform bill, may be the pinnacle vote when the Democratic agenda did itself in.

I don't deny that the motives of my colleagues on the other side of the aisle are genuine. We all want to improve access to health insurance for Americans, but this is not the way to do it. And the American public sees that. They see it, and they are frustrated that the majority in Congress is ignoring their pleas.

Over the past several months, I have talked to tens of thousands of Nevadans about this bill. Nevadans have told me loud and clear that this is not the cure for our broken health care system.

I have heard from small business owners, like Boyd Betteridge, in Winnemucca, NV. Boyd and his wife have worked hard to build a small business over the past 15 years. They employ about 25 employees and fear that if this bill passes, they will have no choice but to fire employees or even close shop.

Boyd says that government regulation makes it harder for him to survive. He is frustrated and upset that politicians in Washington, DC, don't feel the pain of the small business owners working hard to make ends meet and to create jobs. Boyd serves his community—he sits on the school board, he is part of the engine of our economy, and he is in real pain. This health care bill doesn't help Boyd Betteridge.

And it doesn't help Dan Grigsby. He is the controller at Renner Equipment Company in Yerington, NV. Dan works for a company that employs about 25 to 30 people. The owners have committed over the years to provide health insurance to their employees. Because costs have increased, they have taken advantage of health savings accounts as a way of providing for their employees in a more cost-effective way. Health savings accounts have been very well received at Renner Equipment in Yerington and at similar businesses around the country. They help patients become consumers in the health care marketplace. That is an important step in reducing health care costs.

Unfortunately, it appears that the minimum benefit standards in the bill before us today could take away the ability of Americans like Dan Grigsby to keep an HSA. Prohibiting the use of HSA funds to purchase over-the-counter medications will further limit the options that employers have to provide meaningful health care to their employees.

And it sure doesn't help the more than 100,000 Nevada seniors who choose a Medicare Advantage plan. Their extra benefits will be reduced by more than half. While we are at it, this bill doesn't help the typical Nevada family who purchases health insurance in the individual market. Their premiums will go up 10 to 13 percent.

This bill doesn't help middle-income union workers in Nevada either. Our hard-working hotel maids, casino restaurant workers, airline workers, teachers, and police officers will share the burden of the \$200 billion tax on health insurance holders. This bill doesn't help the hospice community—they face about a \$7.7 billion cut in payments.

Many of the hospices in Nevada—including the one where my grandmother received care—may not be able to survive these reimbursement cuts.

In another hit for an integral part of our health care system, the home health community will see cuts of approximately \$40 billion in this bill. For Nevada home health providers, that means about \$264 million in cuts over 10 years, according to some estimates. This bill surely doesn't help them.

So, let's see. So far, this bill doesn't help small business owners, Americans with health savings accounts, families purchasing health insurance, union workers, seniors, hospices, or home health. If you aren't in one of these groups, don't breathe a sigh of relief just yet.

Fifteen million American workers will pay for new taxes and “penalties” with reduced wages and lost jobs. And then there are taxes on prescription drugs, clinical lab work, and medical devices—all passed on to consumers. An over 2,700-page bill full of new taxes on Americans, funding cuts for programs they rely on, and raised premiums. That is why the Nevadans are not behind this bill, and that is why the American public is not behind this bill.

Beyond the financial impact of this bill, Democrats set a dangerous precedent by requiring every American citizen to purchase health insurance coverage. Americans who fail to buy health insurance that meets the minimum requirements would be subject to financial penalties. Is it really constitutional for this body to tell all Americans that they must buy health insurance coverage? And, if so what is next? What personal liberty or property will the Congress seek to take

away from Americans next? Will we consider legislation in the future requiring every American to buy a car? Will we consider legislation in the future requiring every American to buy a house? Where do we draw the line or will we even draw one at all?

I don't think Congress has ever required Americans to buy a product or service like health insurance under penalty of law. I doubt that Congress has that power in the first place. As the CBO explained in the 1990s, "A mandate requiring all individuals to purchase health insurance would be an unprecedented form of federal action. The government has never required people to buy any good or service as a condition of lawful residence in the United States."

There is no doubt that we need to change health care in this Nation. Americans don't want billions in new taxes, they don't want to lose their current insurance coverage or the choice to decide their coverage, and they don't want a bureaucrat coming between them and their doctor.

This vote isn't about voting for this bill or doing nothing. We can go back to the drawing board, take the best ideas from each side, and put together health reform that will take us into the future.

Republicans have come up with many ideas on ways to fix our Nation's broken health care system. The answer is not with unbearable taxes, unsustainable growth of the government, or paying for a brand new entitlement program. Those aren't the qualities of comprehensive health care reform. They are the qualities of terrible policy that will lead to devastating results for Americans and our health care system. There is a better way. It will take time, but if we can change the way that Americans think about health care, than we can create a better system.

Imagine a system where Americans get to keep their choices in health care and where they are allowed to buy insurance across State lines. Imagine a system where there is transparency—where you know how much a doctor's visit will cost and how much your surgery will be—where you can shop around for the best value for your money. Imagine a system that rewards individuals for engaging in healthy behaviors. Imagine a system where you are not punished for having a pre-existing condition. Imagine a system that allows small businesses to pool their purchasing power to provide health insurance to their employees through Small business health plans. Imagine a system where doctors can practice medicine to heal patients instead of practicing medicine with the goal of not being sued. And imagine a patient-centered health care system, not an insurance-centered or government-centered health care system.

These are all standards that we should work toward. We shouldn't assume that this bill before us is our last, best option for health care reform. We can't afford to settle for this bill.

The Democrats see how close they are with this bill, and they want a victory so badly. They are working every possible angle to get the 60 votes they need. They have literally given sweetheart deals to a few just to get their votes. They think this is the political victory that is going to help them win over the American people. And they are borrowing trillions of dollars from our children and grandchildren to get the job done—and that is just with this health care bill.

We simply cannot survive the Democratic agenda of taxing and spending away our future. We can't survive it, and we can't afford it.

Mr. AKAKA. Mr. President, I am proud of the health care system that we have in Hawaii. We have developed innovative approaches to provide health insurance coverage. Hawaii consistently is ranked amongst States with the highest rates of health insurance coverage. An October article in the New York Times pointed out that Hawaii's health insurance premiums are tied with North Dakota for the lowest in the country and its Medicare cost per beneficiary is the lowest in the Nation. Our residents also tend to live longer than individuals living elsewhere in the country.

Our system is not perfect. An increase in unemployment has led to more people losing their health insurance. Insurance premiums have been rising. Our health care providers are struggling to meet the increasing burdens imposed on them by greater numbers of uninsured patients and rising costs. There are substantial access issues in many areas of Hawaii, especially on the neighbor islands. We have a significant shortage of health care professionals, particularly in certain specialties.

I support the Patient Protection and Affordable Care Act because it will improve the Nation's health care system and help address many of the problems in Hawaii. This legislation expands access to coverage, includes policies aimed at improving the quality and availability of health care services, and attempts to slow increasing health care costs. The legislation will also ensure that individuals with preexisting conditions will be able to get insurance. Additionally, the bill will prohibit unfair lifetime limits imposed by health insurance companies on individuals.

The bill strengthens the health workforce and primary care systems. Improvements to the National Health Service Corps, scholarship, and loan repayment programs will help train additional health care professionals. Additional investments in federally quali-

fied community health centers will improve access to primary care services.

The act improves access to quality and affordable care nationally, while recognizing the unique health care needs of Hawaii. I appreciate the inclusion of two provisions in the legislation of tremendous importance to my home State. A significant contributing factor to Hawaii having a high percentage of residents insured is our employer-mandated health care system. Our employer mandated health care system depends on our longstanding exemption from the Employee Retirement Income Security Act, ERISA. I appreciate the inclusion in the Patient Protection and Affordable Care Act of a rule of construction that is intended to preserve our unique ERISA exemption and the employer-mandated insurance that the exemption enables. This rule of construction will ensure that the employer-provided insurance, as mandated by the Hawaii Prepaid Health Care Act, is maintained and that nothing in this act will be used to take away the health benefits provided to workers in Hawaii or alter the responsibilities imposed on employers. It is essential that as we try to expand access to health care that we build upon the existing system of coverage in Hawaii rather than replace it.

The hospitals in Hawaii continue to have difficulties trying to care for uninsured and Medicaid beneficiaries. Medicaid disproportionate share hospital, DSH, payments are intended to support hospitals that care for significant numbers of Medicaid and uninsured patients. Hawaii does not have a permanent Medicaid DSH allotment.

The Balanced Budget Act of 1997 created specific DSH allotments for each State based on their actual DSH expenditures for fiscal year 1995. In 1994, Hawaii implemented the QUEST Medicaid demonstration program. The prior Medicaid DSH program was incorporated into QUEST. As a result of the demonstration program, Hawaii did not have DSH expenditures in 1995 and was not provided a DSH allotment. The Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 modified the DSH program, which included the establishment of a floor for DSH allotments. States without allotments were again left out. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 made modifications to DSH program, which included an increase for low DSH States. States without allotments were left out again.

The Tax Relief and Health Care Act of 2006 temporarily restored Hawaii's allotment. Hawaii's temporary allotment was extended by the Medicare, Medicaid, and SCHIP Extension Act of 2007, the Medicare Improvements for Patients and Providers Act of 2008 and the CHIP Reauthorization Act of 2009.

However, Hawaii's temporary DSH allotment will end after December 31, 2011.

This bill will permanently restore Hawaii's Medicaid DSH allotment. This restoration authorizes the submission by the State of Hawaii of a State plan amendment covering a DSH payment methodology to hospitals that is consistent with the requirements of existing law relating to DSH payments. The purpose of providing a DSH allotment for Hawaii is to provide additional funding to the State of Hawaii to permit a greater contribution toward the uncompensated costs of hospitals that are providing indigent care. It is not meant to alter existing arrangements between the State of Hawaii and the Centers for Medicare and Medicaid Services, CMS, or to reduce in any way the level of federal funding for Hawaii's QUEST program.

I look forward to continuing to work to further improve the legislation and bring about the enactment of health care reform legislation.

Mr. LEAHY. Mr. President, we have reached a defining moment for the Senate and for the American people. The bill we have considered will rank alongside other major decisions such as the creation of Social Security and Medicare and the Civil Rights Act. Health insurance reform has been talked about and attempted for seven decades. The American people for years have named health insurance as among the greatest concerns in their daily lives. Now, here at hand, is the opportunity to act.

This has been an arduous process. The President has rightly noted that if health insurance reform were easy, it would have been done long ago. The defenders of the status quo have spared no expense—nor have they been sparing in their distortions—to keep the system that pays them so handsomely. Health reform will benefit every American of today's generations. But let us especially think ahead one, two or three generations. If we were to abandon our responsibility now, saying it was too difficult, that would be an excuse for doing nothing that our children and grandchildren would never accept.

For many reasons, including the health of public discourse on the most pressing issues we face as Americans, it is regrettable that the defenders of the status quo, doing their utmost to influence this debate from their comfortable perches outside the Senate, have stooped to new levels to obstruct health insurance reform. Friction is a byproduct of reform, especially when well-funded and entrenched special interests rally to protect the status quo. The heat of this debate is a measure of the cozy setups that these reforms will unsettle. This year alone Senate Democrats have been forced to contend with 101 filibusters by the minority Repub-

licans. Even on an issue this important, health insurance reform is still being subject to filibuster and parliamentary delay to a level I have not seen in 35 years in the Senate.

Opponents of reform unfortunately have wasted much of the public's time by provoking arguments over their distortions about what health reform really means. The country suffers when there is a failure to act on serious challenges that millions of ordinary Americans face in their daily lives.

The arguments that we hear today to prop up the status quo by knocking down challenges to the way things are seem eerily similar to those made against creating Medicare nearly 45 years ago. Opponents then tried to demonize the plan and claimed it would never work. During the debate decades ago on Medicare, one Senator said: "It would achieve little for those who need it, while subjecting the very fabric of American life to the strain of severe and unnecessary sacrifices."

Eventually during that historic debate, Members from both sides of the aisle worked together to pass a bill that is one of the most successful, purposeful and popular programs today. The Medicare Program, like Social Security, was not perfect when it began, but improvements have been made over time. Vermonters can be proud that our State's congressional delegation, all Republican at the time, supported passage of that landmark legislation.

The Senate has overcome the stalling and delay tactics, the filibusters and the roadblocks to the consideration of health care reform, and now we are closer than ever to passing comprehensive and meaningful health insurance reform.

Is the Senate health care bill without any problems? No. Is the bill before us the one I would have drafted or the one that any other Member of the Senate would have drafted? Of course not. Extensive negotiations and refinement were needed to produce a bill of this scope and importance, as it should be in the legislative process. The difficulty was magnified by the minority's calculated decision to spend their efforts to undermine, instead of to constructively engage. Not only majorities but supermajorities were required at several steps in the Senate's work on this bill. There are 100 Senators and 435 Members of the other body who will have to stand up and be counted in this historic process. The votes of most, I believe, will be tallied on the right side of history and of the real-life, everyday needs of the American people for real health insurance reform.

Some say the bill before us does not go far enough. Others say it goes too far. What everyone can agree on is what will happen if we do nothing.

In the next decade, without reform, half of all nonelderly adults will find themselves without coverage at some

point. The number of people without insurance will jump by more than 30 percent in 29 States and by at least 10 percent in every State. American families will continue to pay a hidden tax of \$1,100 on their health insurance premiums to pay for the costs of care for the uninsured. The very same insurance coverage a family has in 2008 is projected to nearly double to \$24,291 by 2016, consuming a whopping 45 percent of projected median family incomes. Premiums will continue to double every several years, making health insurance vastly unaffordable for many Americans. Economists project that if health insurance reform fails, the resulting lower gross domestic product, GDP, will reduce family incomes by \$10,000 by 2030. Small businesses will continue to struggle and fewer and fewer will be able to offer coverage to their employees.

Furthermore, as our population ages, Medicare is projected to be insolvent within 10 years, jeopardizing coverage for millions of American seniors. Each day that passes without reform, 14,000 Americans lose health insurance coverage. These are not minor problems to be brushed aside or kicked yet again down the road for another generation of Americans to tackle. These problems are on the Senate's doorstep, right here, right now. Keeping the status quo guarantees a struggling economy in the future, with more Americans unable to afford lifesaving treatments because of the rising cost of insurance.

In 2001, 46 percent of all bankruptcies were attributable to medical costs. By 2007, that number had grown to 62 percent. While hard-working Americans were losing their jobs, homes and savings simply because they got sick, insurance and pharmaceutical company executives were making record profits. In 2000, the 10 largest publicly traded health insurance companies had profits of \$2.4 billion. By 2007, profits at those firms had jumped to \$12.9 billion, a 428-percent increase. In 2007, CEO salaries at these firms were \$118.6 million or \$11.9 million for each CEO. In 2007, prescription drug companies had a profit margin of 15.8 percent. The same year, profit margins at all Fortune 500 firms were 5.7 percent.

Since the Nation's last attempt to pass health reform 16 years ago, millions of Americans have lost their insurance and costs have skyrocketed. In the absence of a fair and sensible health insurance system, families, businesses and taxpayers have been dragged along by an inflationary curve that only worsens with time. Next year, small businesses—already suffering from skyrocketing medical costs—will see their premiums rise by an average of 15 percent—twice the rate of last year's increases. Drug companies have boosted prices of brand-name drugs by about 9 percent over the

last year, the steepest increase in years.

Even though Vermont has long recognized the importance of building a health care system that includes all Vermonters, individual States acting alone cannot make enough progress without comprehensive health insurance reform. Tens of thousands of Vermonters still lack basic health insurance. Workers nationwide are losing insurance for their families when they change or lose jobs. Insurance companies can and do discriminate against sick people.

I know so very many of these Vermonters. Many of them are my neighbors, my friends. Some of these Vermonters without health insurance went to school with me. Some grew up as I did in Montpelier, VT. Some are people I have known all our lives. They are hard-working, good, honest, decent people. It is a travesty that after working so hard and playing by the rules they still cannot begin to have the kind of health coverage that Federal employees—including those of us in this Chamber—are able to have because of earlier reforms of the Federal workforce health insurance system.

Too many Vermont families live in the shadow of constant insecurity because they know that if they have an illness or if they lose a job, it might mean the end of their health insurance. Too many Vermonters are forced to sell their homes or file for bankruptcy to pay their health insurance bills. In no other modern society are families confronted with such heartbreaking dilemmas.

Let me give a personal example. I heard recently from a Vermonter who only periodically had health insurance throughout his life and now goes without prevention and screenings and pays for everything out of pocket because he cannot afford any health care that is not urgently needed. Tragically, his wife was in a car accident, and even though the couple paid thousands in treatments, they “had to stop short” in giving her the necessary physical therapy and medications her doctors recommended because of the costs involved.

Another Vermonter, who is lucky enough to have insurance, says her family pays almost \$1,100 each month in premiums, and yet they have to reach a \$3,000 deductible before the insurance company will pay a dime. She told me that “as the cost of health insurance continues to rise, it feels like we will be swallowed whole by it.”

These should not be stories heard in today's America. We remain the only industrialized Nation in the world that lets its citizens fend for themselves without health coverage.

The bill before us would make giant leaps toward reforming our health insurance system. Under the Senate bill, 31 million more Americans would have

health insurance, bringing coverage to 94 percent—the highest level of insured Americans ever in our history. More low-income Americans will be able to access the State Medicaid Programs, and middle-income families will get enough help to be able to buy health insurance through State-based health insurance exchanges, which will be closely monitored. Insurance companies will never be able to drop your coverage, charge you more, or deny you or your children coverage because of a preexisting health condition. This bill also sets standards for qualifying health insurance so the insurance companies can no longer sell you coverage that does not actually help when you are sick. The legislation also contains a Patient Bill of Rights, long championed by Senator Kennedy, which guarantees that patients have a right to appeal denials or decisions by their health insurance companies.

The insurance industry will no longer be allowed to pay excessive executive bonuses and salaries on the backs of their customers. All insurance companies will be required to spend more of their premium revenues on clinical services and quality activities, with less going to administrative costs and profits—or else they will have to pay rebates to policyholders. This change will improve quality of care and will hold the insurance industry accountable for their spending.

Small businesses, which make up more than 80 percent of the businesses in Vermont, at long last will have access to affordable care under this bill. This bill will make tax credits available to small businesses to help them offer health insurance to their employees. These tax credits will make health insurance more affordable both for small businesses and for their workers.

The nonpartisan Congressional Budget Office confirmed that the reforms in the bill—including lower administrative costs, increased competition, and better pooling for risk—will lower premiums for American families. CBO estimates premiums for the overall population will be reduced by 8.4 percent.

In addition to the consumer protections and industry accountability provisions, this bill also takes significant strides to slow the growth of the spiraling health spending that has the potential to cripple our economy in the years to come. A substantial portion of the Senate bill is devoted to testing ways to reduce health care costs while improving quality over time. The bill contains pilots for efforts like Vermont's Blueprint for Health, under which patient care is coordinated to reduce unnecessary hospital visits and to keep patients healthy. Other programs will test various ways to pay doctors and hospitals that could be more efficient than the current fee-for-service structure. A greater emphasis on prevention—long supported by Senators

KENNEDY and HARKIN in the Health, Education, Labor, and Pensions Committee—will reduce preventable deaths and hospitalizations.

While these improvements to our health care system are significant and noteworthy, I am disappointed that the bill no longer includes a public insurance option to compete with private plans, nor does it include a provision I have proposed to repeal the antitrust exemption for health and medical malpractice insurers. Though there are differing views on the best ways to inject competition into the health insurance market, we can all agree that health and medical malpractice insurers should not be allowed to engage in blatantly anticompetitive practices, such as colluding to set prices and allocating markets. My legislation would ensure that basic rules of fair competition apply to insurers. I believe that repealing this antitrust exemption, combined with the public option, would go far in providing fair competition and choice in the health insurance marketplace.

With all the progress the Senate's health care bill makes in the area of women's health—such as prohibiting insurance companies from discriminating against women through higher premiums and by allowing women free access to vital preventative services—it is unfortunate the bill also threatens to chip away at women's reproductive choices. Before a restrictive provision was added in the managers' amendment, the bill would have maintained current law by restricting Federal funds for abortions. The original Senate bill would have required insurance companies to segregate public and private funds to ensure no public funds would go to abortion services. Now, instead, the Senate bill would require women who purchase insurance on the exchanges to make two payments if they wish to have a wide range of choices. States could also opt out of allowing abortion to be covered at all on their exchanges, leaving women with fewer choices than they have now on the individual insurance market. While this language is far less restrictive than the language in the House-passed legislation, there is legitimate concern that despite the interest of women to have this choice available in the marketplace, this language would prompt private insurers to stop offering such options at all. I hope a better solution comes in conference.

After one of the cliffhanger votes over the course of this long Senate debate, I spoke privately with Vicki Reggie Kennedy, the courageous and insightful widow of our beloved friend, Senator Edward Kennedy. This is a bittersweet time for her and for all who know how fully he was committed to winning this battle to lighten the load for the ordinary Americans who are struggling so mightily today. Health

reform was the first of the many causes of his life and of his work in this body.

We talked about how he would have relished this moment, and we talked about how he would have pressed his shoulder to the tiller to steer the Senate toward the right outcome for the American people. Though Senator Kennedy strongly supported including a public option, as I have, along with other reforms such as ending health insurers' antitrust exemption, Vicki Kennedy knows, as I do, that he would be fighting to pass this bill. This is the Senate's opportunity to advance real reform. This is a bill that reflects the core principles the President outlined in beginning this debate early this year.

This is reform based on the existing system of employer-based insurance, offered by private insurers with health services delivered largely within the private sector. But any objective reading of this bill makes crystal clear that this is real reform. This is a bill that will improve the lives of every American. This is a bill that is a credit to this good and great Nation and its people.

At its best, the Senate through our history has been able to act as the conscience of the Nation. Those moments were forged amid fervent debate and with the purpose of advancing a pressing national interest. This is such a time, and my hope and belief is that the Senate did rise to the occasion.

Mr. DORGAN. Mr. President, the health care reform bill we voted on today in the U.S. Senate merited my support because it is a fiscally responsible bill that will expand health care coverage to tens of millions of Americans who are currently uninsured, reduce health care costs for families and small businesses and strengthen our health care system in rural America.

While I recognize that this is a very controversial issue, I believe that the status quo is unsustainable. Our country spends nearly twice as much on health care as most other countries in the world. And the cost of health care and its claim on our economy is increasing every single year.

There are some tens of millions of Americans who are not covered with health insurance and whose health care costs are then transferred to the rest of the American people to pay. It is estimated that those with insurance pay, on average, \$1,000 per year in a hidden tax to cover the uncompensated care given to those who don't now have health insurance.

So, I think it is important for us to try to put the brakes on increasing health care costs, and also to extend health care coverage to those who now don't have it.

I told citizens of North Dakota that I would not support a government takeover of health care. This legislation is not a government takeover. I have said

that I would not support public funding for abortion. This legislation does not provide public funding for abortion. I have promised that I would not support legislation that provides health care for illegal immigrants. This legislation does not.

But you wouldn't know those facts if you heard the negative advertising about the bill. In North Dakota alone, nearly \$2.2 million has been spent on advertising that, in many cases, is just not honest. These ads are paid for by out-of-State groups and big interests that have a lot at stake and will do anything to defeat the health care reform bill. The first amendment allows these groups to do this but it does nothing to advance the debate since most of these attacks have been based on lies and scare tactics.

This health care bill includes important protections that will stop insurance companies from taking advantage of patients. It begins to reform the delivery of health care in a way that would control costs and improve the quality of health care. It will increase competition in the insurance market by allowing insurance companies to compete across State lines and by offering nationwide plans. It also establishes pilot programs to support creative ways to deal with medical malpractice reform.

In addition to being paid for, the legislation also extends help to individuals and small businesses that need assistance to afford health insurance.

And the legislation contains important provisions to strengthen health care in rural America, including a provision I added called the Frontier Amendment, with Senator CONRAD.

For the first time in many decades, this bill finally provides fair reimbursement to North Dakota and several other States who have the highest quality health care, but the lowest reimbursements under Medicare. This new fair payment system will mean a strengthened health care system for senior citizens on Medicare. It will also mean a better health care system for all North Dakotans because there will be less cost shifting among individuals with private policies in order to cover the shortfall in Medicare reimbursement.

The bill guarantees that Medicare services to senior citizens will not be cut or affected in any way. In fact, the bill improves the solvency of Medicare.

The health care reform bill in the Senate is being supported by the American Association of Retired Persons, AARP, the National Committee to Save Social Security and Medicare, American Hospital Association, American Medical Association, and many, many consumer groups across the country.

So this bill is about a lot of things. It is about standing up for American business and growth in our economy. It is

about standing up for senior citizens and Medicare. It is about creating a better health care program for all Americans. For those reasons, I voted yes to move this process along in the hope this bill will be further improved in the weeks ahead.

This is not a perfect piece of legislation for sure. But voting for this legislation in the Senate moves it along to a conference with the House of Representatives, which is another step in determining whether we can write legislation that advances our country's interests.

Mrs. FEINSTEIN. Mr. President—I voted to support of the Patient Protection and Affordable Care Act of 2009, which will reform our Nation's health care system.

This is our chance to fix a broken system. We tried in 1993 and 1994 and failed. Over 15 years have passed since our last effort. This may be our last, best opportunity before we are forced to wait another 15 years for real reform. And our country cannot afford to wait another 15 years. Our system is simply unsustainable.

Now this bill is not perfect, and without question there are items I would like to change. I believe it is a work in progress. However, it accomplishes several important objectives.

The bill is incremental. There will be time to make needed adjustments before it is fully effective.

It expands insurance coverage and provides new consumer protections from insurance company abuses.

It does all this in a fiscally responsible way, reducing the deficit and prolonging the solvency of the Medicare trust fund.

Throughout this process, I have argued that health reform should be incremental. I believe that in many ways, this bill is incremental.

It leaves the best of our health care system in place. The majority of Americans with coverage continually say they are happy with their insurance. Under this legislation, they can keep what they like.

The bill also will be phased in over the next several years. People in need of coverage will receive immediate help in many forms.

Beginning in 2010, next year, the Federal Government will spend \$5 billion to establish a high-risk pool, which will provide subsidized coverage for those who have been denied private insurance on account of a preexisting condition.

Young adults will be able to remain on their parents' health insurance until age 26. Many young adults currently lose their coverage as soon as they graduate from college; this will allow them to maintain their coverage while they find a job.

Seniors enrolled in the Medicare prescription drug benefit will receive an additional \$500 in drug coverage before

they encounter the so-called doughnut hole coverage gap. This is the coverage gap that occurs after seniors spend \$2,830 on prescription drug costs. They are then required to pay the full amount out of pocket, until their costs total \$4,550. This additional \$500 of coverage means that seniors will encounter a small gap in their drug coverage and pay less out of pocket.

There will be new limits on the amount of premium dollars that can be spent on non-health care expenses by all health insurance companies. This is very important—I have long worried that insurance companies spend too much on administrative expenses, like medical underwriting, claims processing, overhead, and profits and salary, and not enough on actual medical care. Starting next year, plans sold in the individual and small group markets must devote at least 80 percent of premium dollars to health care expenses; and plans sold to large groups must spend at least 85 percent of the premium funds they collect on health care services. This provision will give people the assurance that most of their premium dollars go to pay for care.

Also next year, small business can receive tax credits to help cover the cost of covering their employees. These credits will be available on a sliding scale to employers with 25 or fewer employees, with average annual wages of \$50,000 or under.

Expansion of community health centers. Beginning in 2011, the Federal program that supports community health centers will begin to receive significant additional funding, totaling \$10 billion through 2015.

This expansion of community care helps guarantee that we are providing not just coverage for medical care but also access. A health insurance card does no good if no physician will accept it. These clinics provide care for all and in many places will be the backbone of a reformed health care system.

Finally, in 2014, the full scope of the reform effort will come in place. People will be able to compare their coverage options in newly created exchanges, and in many cases they will receive tax credits to help them purchase coverage.

This allows plenty of time to see how reforms are working and, if necessary, for Congress, the administration, and States to make adjustments to ensure that health reform is effective.

The bill contains several critical insurance industry reforms that will help cover 31 million additional Americans. I am convinced that our country's for-profit health insurance industry operates with profits, not people, in mind. And this legislation will contain a number of new standards that this industry will need to meet.

They will not be allowed to discriminate based on gender.

They will not be able to take away coverage once a person gets sick.

They will not be able to charge more, or deny coverage entirely, based on an individual's health history or pre-existing conditions.

Insurance will be sold in regulated markets called exchanges, where consumers can easily compare their different insurance options. Web sites allow Americans to easily compare prices when shopping for airline tickets, and this will extend the idea to health insurance.

These exchanges will work on behalf of consumers to negotiate lower prices and to ensure that participating plans meet high standards. Consumers will receive clear information about what is covered and how much it will cost. They will have several different levels of coverage from which to choose.

Every exchange will also offer two national plans, overseen by the Federal Office of Personnel Management. This office ensures that Federal workers and Members of Congress have good health plan choices. One of the included plans will be offered by a nonprofit company. For consumers in highly concentrated markets with only a few choices, these national plans will provide a new option for quality coverage.

Most importantly, these exchanges will consider the previous behavior of insurance plans. If a company raises rates unfairly over the next several years, exchanges will consider this and decide whether they should be allowed to sell in these new markets.

This is a strong incentive for plans to treat consumers fairly.

All of this is accomplished in a fiscally responsible manner. The bill saves money, and it saves Medicare.

It is clear that we cannot afford to continue on our current path.

It expands coverage to an additional 31 million Americans while reducing the Federal budget deficit by \$132 billion by 2019. Deficit reduction increases in the second 10-year period that the bill will be in effect.

Now, this is a major point of contention. I continue to hear the other side say that this bill will cost \$2.5 trillion over 10 years. Even the Republicans' own analysis shows that the bill will reduce the budget deficit. The Budget Committee's minority staff released an analysis that examines the bill's net cost and savings over the next several decades.

The Republican staff projects that the bill will reduce the deficit by \$176 billion from 2014 to 2023.

This number grows to \$1.032 trillion from 2020 to 2029.

The total net deficit reduction, according to Republicans, is \$1.165 trillion from 2010 to 2029.

Let me say it again. These are partisan estimates, produced by Republican staff, and they show significant, meaningful deficit reduction.

The bill also takes a first step at prolonging the solvency of the Medicare

Program. Without action, Medicare will be insolvent in 2017. That is 9 short years from now.

This bill extends Medicare's solvency by approximately 4 to 5 years. Make no mistake, more must be done. The Chief Actuary at the Centers for Medicare and Medicaid estimates that it extends solvency to 2026. And I believe this bill lays the groundwork to help make Medicare more sustainable.

It contains a Medicare Commission, which will examine the program and make recommendations to Congress on an expedited basis.

It creates accountable care organizations, in which physicians work together to provide more efficient care for patients, while sharing in some of the savings they generate for the Medicare Program.

Controlling entitlement spending must be a priority, and I believe this is an important step in the right direction.

Throughout the health reform process, I have emphasized the importance of a health reform bill that meets the needs of large and complex States such as California.

My State, without question, has one of the largest and most complex health care systems. As a result, we face some of the most complex challenges.

Over 6.6 million Californians are uninsured. The State is experiencing an unprecedented budget crisis. And even after health reform, the State will still have as many as 2 million undocumented, which will continue to strain public hospitals, emergency rooms, clinics and other providers.

California's public hospitals play a key role in meeting these needs and care for the poorest of the poor. These hospitals rely on payments called Medicaid disproportionate share hospital, DSH, funding to cover their costs, both for the uninsured that they cover and the very low reimbursement rates their receive from the Medicaid Program. DSH funding accounts for, on average, 40 percent of public hospitals' total funding.

I am pleased that the managers' amendment has slightly reduced the annual cut to Medicaid DSH funding that California and other States that use their full allotments will receive.

Under the original bill, California would have received a 50 percent cut in Medicaid DSH once the rate of the uninsured in the state dropped by 45 percent under this version, the state's allotment will only be cut by 35 percent. This reduces a \$550 million cut to \$385 million, for a savings of approximately \$165 million per year to California.

States are now guaranteed to keep at least 50 percent of their current Medicaid DSH allotments, which will provide long-term stability to this critical program.

I am grateful to Senator REID for making these adjustments, and I will

continue to work with my colleagues in the House to keep as much of this critical funding intact as possible as the process moves forward.

The cost to California from the expansion of Medicaid remains a serious concern.

The bill will cover the full cost through 2016 generated by opening the program to all adults who earn less than \$14,400 per year, which is 133 percent of the Federal Poverty Level, FPL. However, California will need to maintain this expansion and will also have to find a sufficient number of doctors willing to take patients newly eligible for Medicaid.

This will cost money. Health reform should not bankrupt large States like California. Ensuring that health reform works for my State will be a top priority as this legislation moves to conference.

I am also concerned that the structure of the annual tax on the health insurance sector may have unintended consequences that will have a disproportionate impact on California. This tax will generate roughly \$60 billion over the next 10 years.

The impact of this provision would be disproportionate on States such as California, which have a high proportion of fully insured coverage. For example, 77 percent of the commercially enrolled population in California is enrolled in fully insured health plans. This includes public employee plans such as CalPERS and the city and county of San Francisco.

The net result is that California would pay upwards of one-third more than the average State on a per capita basis. Many integrated nonprofit health plans, some of which have been cited as models of efficiency, would face additional expenses and consumers would be impacted through higher premiums and limited choices.

Now, an exemption is provided for nonprofit insurers in the managers' amendment—for example, nonprofits with an overall medical loss ratio of 90 percent or better or nonprofits in a State which regulates premium increases could be exempt from the tax.

But this would have a limited impact in California and our two largest nonprofit insurers—Kaiser Permanente and Blue Cross/Blue Shield may not qualify for the exemption. Because California lacks an entity to regulate premium increases, the only way nonprofit insurers in our State will likely qualify for an exemption is by meeting the medical loss ratio requirements, set at 90 percent overall in the bill. This is a high hurdle to meet, and I worry these additional costs could appear in the premiums paid by Californians.

The most important component of successful health reform remains controlling health insurance premium increases. I remain concerned that com-

panies will attempt to take advantage of the period of time between the passage of legislation, and 2014, when exchanges are up and running with new consumer protections. We have seen this with credit card companies since credit card reform legislation passed, and I fear health insurance will be no different.

I proposed an amendment to create a Medical Insurance Rate Authority and to ensure that all insurance companies are subject to some type of rate review.

The amendment asks the National Association of Insurance Commissioners to produce a report, detailing the rate review laws and capabilities in all 50 States. The Secretary of HHS will then use these findings to determine which States are capable of doing sufficient rate reviews to protect consumers.

In States where insurance commissioners have authority to review rates, they will continue to do so. In States without sufficient authority or resources, the Secretary of HHS will review rates and take any appropriate action to deny unfair requests. This could mean blocking unjustified rate increases, or requiring rebates, if an unfair increase is already in effect. This will provide all American consumers with another layer of protection from an unfair premium increase.

The amendment would also require the Secretary of Health and Human Services to establish a Medical Insurance Rate Authority as part of the process in the bill that enables her to monitor premium costs.

The Rate Authority would advise the Secretary on insurance rate review and would be composed of seven officials who represent the full scope of the health care system including at least two consumers, at least one medical professional, and one representative of the medical insurance industry. The remaining members would be experts in health economics, actuarial science, or other sectors of the health care system.

Unfortunately, this amendment was not included, at the insistence of one member of our caucus. I look forward to working with conferees to find some way to ensure that more Americans are protected from unfair premium increases.

With all the debate over offsets, CBO projections, premiums, and matching funds, it is easy to forget that at the end of the day, we are talking about people. The bill we are debating, I believe, will save lives.

A lack of health insurance is more than an inconvenience; it can be deadly. Americans age 64 and under who lack health insurance have a 40-percent higher risk of death than those who have coverage. This is Dr. David Himmelstein from a Harvard Medical School Study of September 2009.

These are real people, who die earlier than they need to because of problems

getting coverage and problems with our health care system. Expanding health coverage is a moral issue, one that, I believe, reflects the character of our Nation. In the richest country in the world, no one should die because they cannot afford health coverage.

For all of this bill's imperfections, I am convinced that it will mean the difference between life and death for some people. And it is not every day that we can say that about a piece of legislation.

We could not pass up this opportunity.

I have joined my colleagues in supporting this bill.

Ms. MIKULSKI. Mr. President, today is a historic day. After decades of discussions and promises, we have taken a giant step forward in providing universal access to health care. I was proud to vote for the Patient Protection and Affordable Care Act. It extends coverage to 31 million Americans who don't have health insurance now.

Our bill is a step forward in achieving my four principles of health care reform: saving and strengthening Medicare; ending punitive insurance company practices that deny coverage based on preexisting health conditions, age and gender; providing universal access; and emphasizing quality, prevention and integrative health to save lives and save money.

I like the Patient Protection and Affordable Care Act because it saves and strengthens Medicare. The bill extends Medicare solvency; promotes care based on value not volume; closes the prescription drug coverage gap with a 50-percent discount on brand-name medications for seniors who fall into the gap; stops insurance companies from charging seniors four or five times more for insurance than young people; and removes the cost barrier to preventive care by eliminating deductibles, copayments and other cost sharing for seniors.

This bill helps the good guy businesses that want to provide insurance, but can't because it costs too much. I come from a small business family. My father was a grocer and my grandmother ran a small bakery. So I grew up in a family that knew what it was to face a weekly payroll.

The Patient Protection and Affordable Care Act protects small businesses with fewer than 50 employees. It gives them tax credits to be able to afford insurance for their employees. The Senate bill creates new insurance exchanges for small businesses and individuals who don't get insurance through work. It is like an online shopping mall for insurance. It provides individuals and businesses the same bargaining power as if they were a large group. It gives them the choice and the opportunity to select the best plan they can afford with the care that best meets their needs.

The Senate bill promotes cost savings and greater doctor-patient satisfaction through administrative simplification. The bill creates single standards for electronic transactions that will mean less paperwork and more doctor-patient time.

The Patient Protection and Affordable Care Act will control costs through a new emphasis on integrative health, prevention, and quality. New funding for wellness and prevention programs will support innovative approaches. That includes local initiatives using grassroots strategies to create healthier communities.

The Patient Protection and Affordable Care Act also improves the quality of care. As a member of the Senate Health, Education, Labor, and Pensions Committee, I was charged with establishing our bill's section on improving quality and delivery systems in health care. This section creates a national strategy to improve lives, save lives and reduce costs. This is achieved by promoting best practices like simplifying drug labels, and promoting discharge planning and medication management. These practices save money and improve patient outcomes through reduced hospital readmissions, improved patient safety, and better care coordination.

For example, the Senate bill creates grants to identify, disseminate, and implement innovative best practices to local providers and patients. One such practice is the Pronovost Checklist from Dr. Peter Pronovost at Johns Hopkins University. He developed simple steps to properly insert a catheter and eliminate line infections. When used in Michigan for 1 year, it saved 2,000 lives and \$200 million. We make his checklist—and others like it—available to hospitals across the country.

We also expand the use of medical homes by establishing community health teams. These teams include providers from the primary care physician to specialists and nutritionists. In North Carolina, medical homes save \$175 million each year. Our bill makes medical homes available across the country. These provisions—and more like them—not only save lives, they save money.

I am particularly proud of my women's preventive health amendment included in this bill. Right now, women pay more and get less in health care. For far too long, many insurance companies have treated simply being a woman as a pre-existing condition. They have used every trick in the book to deny coverage to women.

The Mikulski amendment guarantees access to preventive tests that save money and save women's lives. It requires insurance companies to cover preventive care and screenings at no added cost to women.

Without my amendment, there would be no guarantee that women under 50

would be covered for mammograms, no guarantee of an annual women's health exam that would include screenings for heart disease, and no guarantee that women would have access to this preventive care at no cost.

In the Patient Protection and Affordable Care Act I stood up for Maryland. I preserved the Maryland Medicare waiver, which I authored more than 30 years ago. This Maryland waiver is crucial in allowing hospitals to provide uncompensated care without jeopardizing their own financial stability.

What else does this health care reform bill mean for Maryland? It means that more than 1 million Marylanders who aren't covered now will have access to affordable insurance. It gives a helping hand to 50,000 small businesses in Maryland. It means lower costs for the 130,000 Marylanders who fall into Medicare's prescription drug coverage gap. It means that young adults in Maryland can stay on their parents' policies until they are 26 and that they'll have access to affordable coverage after that.

It means that families who are just a layoff, a job switch or an illness away from losing coverage will have health care stability and security. It means that if you like the insurance you have now, you can keep it. Or if you don't have it, you can get it.

And it means that health care reform will be affordable to families and to the nation. We can't let health care bankrupt our families or the government. The non-partisan Congressional Budget Office says the Senate bill will reduce the deficit by \$132 billion over the next 10 years.

And while I support the Patient Protection and Affordable Care Act, I have some serious yellow flashing lights. I hope these issues will be resolved in a more favorable way in conference.

I am for a more robust and transparent public framework to ensure competition and choice in the marketplace. I like public options. Two of my favorite public options are Social Security and Medicare. The Senate bill creates a lot of new customers for insurance companies by mandating insurance coverage. But like big banks, insurance companies don't show remorse for past transgressions. We can't simply trust them to do the right thing. The Senate bill relies heavily on regulation to achieve what could be done with a public framework. I prefer the House public option.

I also continue to oppose the excise tax included in the Senate bill. I am not for taxing the health care benefits of retired public employees and union members to pay for health reform. Some call them Cadillac plans. I call it a "Clunker Idea." The excise tax will just shift costs onto workers through higher deductibles, copayments, and less generous coverage. I am against this back-door tax on middle America

& retirees. Again, I prefer the House version on this.

So we have some work to do.

I will keep fighting for health care reform. Because it is absolutely terrible when you hear—I am sorry your insurance doesn't cover that. It is horrifying when you have no insurance at all because you lost your job or your benefits and you face losing your life savings to pay for the care you need.

I can assure you I will be fighting on the side of Maryland and the American people to complete health care reform in early 2010.

NOT VOTING—1

Bunning

The VICE PRESIDENT. On this vote, the yeas are 60, the nays are 39. Under the previous order requiring 60 votes for the passage of this act, the act is passed.

Mr. DURBIN. Mr. President, I move to reconsider the vote.

Mr. REID. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ENZI. Mr. President, we have debated whether to increase the amount of money the Federal Government can borrow at the same time that we created a massive new entitlement program that will cost the Federal taxpayer trillions of dollars over the coming decade.

Sponsors of the Reid bill have claimed that their bill would reduce the deficit and extend the solvency of the Medicare trust fund. We heard today from the nonpartisan Congressional Budget Office that these claims are false.

In reviewing the Reid bill, CBO stated that claims that the bill would both improve the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would double count a large share of those savings and overstate the improvement in the government's fiscal position.

My Republican colleagues and I have argued for 3 weeks now that the Reid bill takes money from Medicare and spends it on a new, unsustainable health care entitlement. Instead of strengthening the Medicare Program, today we received confirmation that the Reid bill robs Medicare to the tune of nearly \$½ trillion and threatens its solvency.

CBO has said that this robbery does not really strengthen the solvency of the Medicare Program. Instead the bill uses government accounting gimmicks to merely make it look like it is doing something to help the Medicare Program.

The Reid bill cuts \$470 billion from the Medicare Program. Rather than reserving those monies to pay for future Medicare benefits, the bill spends those monies to pay for a new program to provide health insurance for the uninsured.

But because of government accounting rules, any savings are assumed to be used to purchase government bonds that will be saved to pay for future expenses. That allows sponsors of the bill to claim that they are extending the solvency of the Medicare trust fund.

As the only accountant in the Senate, I find it disturbing to see the gov-

ernment using its accounting rules to allow it to spend these savings twice. The sponsors of the Reid bill are counting the savings towards the Medicare Program at the same time those monies are being spent to pay for other Federal spending.

This would constitute fraud in the private sector. If they had to come under the same laws as private business, the administration and Congress would go to jail.

If there is any doubt, listen to what the Congressional Budget Office said:

Unified budget accounting shows that the majority of the [Medicare] trust fund savings would be used to pay for other spending under the [Reid bill] and would not enhance the ability of the government to redeem the bonds credited to the trust fund to pay for future Medicare benefits.

This means the claim that the Reid bill strengthens Medicare is false. The bill robs Medicare to pay for new spending.

Unfortunately this example of government accounting is just one example of the growing problems that our Nation faces. Our Nation's debt is now more than \$12 trillion and our deficit for fiscal year 2009 was over \$1.4 trillion. As a percentage of the economy, our deficit is 10 percent of GDP—the highest it has been since the Second World War. We are faced with increasing the debt limit at a time when our Nation's credit card is maxed out.

I worry about the country that I am leaving for my children and grandchildren. Our Nation is being buried under a mountain of debt, which poses a deadly threat to the future of our Nation.

The government will make up the current deficit by borrowing more money, mostly from China and other foreign governments. These levels of debt are not sustainable. The Chinese Government already made it very clear that they are growing apprehensive about our ability to pay these debts.

As China's apprehension grows, the interest rates we pay on our debt will grow. That means that it will soon cost us considerably more to allow Washington to continue to borrow the money it needs to fund its current spending binge.

As the Chinese Government grows concerned about financing Washington's appetite for rampant spending, it should give everyone in this Chamber pause. Our most fundamental duty as Members of Congress is to wisely manage the power of the purse for our Nation. Congress is currently failing to carry out this obligation.

According to David Walker, the former head of the GAO, at the end of fiscal 2000, the Federal Government had about \$20.4 trillion in total liabilities, commitments, and unfunded promises for Social Security and Medicare. That number rose to \$56.4 trillion at the end of fiscal 2008—a 176-percent

increase in just 8 years. By the end of this year, that number is expected to have risen to \$63 trillion.

On January 15 of this year, the Senate Budget Committee held a hearing on the long-term outlook for Federal debt. We heard testimony from a bipartisan panel of experts, including Dr. Richard Berner, chief global economist for Morgan Stanley; Dr. Allen Sinai, president and chief global economist/strategist for Decision Economics, Inc.; and Dr. Douglas Holtz-Eakin, former Director of the Congressional Budget Office.

Some of these economists were Democrats and some were Republicans, yet all three agreed that the long-term outlook for U.S. debt was grim and that our Nation's creditworthiness was at risk without a plan to address the costs of future entitlements and the multiple bailout/stimulus proposals Congress has passed.

All three panelists endorsed bipartisan commission concepts to address entitlement spending such as the one sponsored by Senators CONRAD and GREGG. And the experts all agreed that the current budget process needs to be reformed to remove incentives to deficit spend. Yet none of those recommendations are evident in the legislation we are voting on today.

Dr. Sinai—one of the Democrat's invited witnesses from that day—testified that we have exceeded several tipping points in creditworthiness in the U.S. economy, but the only reason we don't feel the effects of it now is because "everyone else is drowning too" and investors are fleeing to quality. But how long can that continue?

Further, Dr. Sinai states:

The deficit and debt prospects under almost any scenario are daunting, with deficit-to-GDP and debt-to-GDP ratios not seen before in a G-7 country. This territory is uncharted with no real historical analogue to this kind of financial situation for a major global economic power. . . The answer to whether the U.S. can afford all of the initiatives on its wish list—economic, societal, defense, and otherwise—is no.

Dr. Holtz-Eakin echoed similar statements from other panelists and strongly urged Congress to adopt a plan that conveys to markets a clear path for stabilizing and reducing the debt burden.

That panel appeared before us in January, but we still lack any coherent plan to stabilize our debt. Just last week on Tuesday, Dec. 14, the Peterson-Pew Commission released its first report, *Red Ink Rising: A Call to Action to Stem the Mounting Federal Debt*, which encourages lawmakers to act immediately to stabilize the national debt.

Crafted over the past year by former heads of the CBO, OMB, GAO, and the congressional budget committees, the report strongly urges Congress and the President to commit immediately to stabilize the debt at 60 percent of GDP

by 2018 and develop a specific and credible debt stabilization package in 2010. But there is nothing in this debt limit bill that does either of these things.

Some Senators will argue today that raising the debt ceiling is the only fiscally responsible choice before us. I disagree. A vote to raise the debt ceiling is merely a vote to raise taxes on our children and grandchildren.

This cycle of kicking our responsibilities to the next generation must stop and it must stop today. In my view, the only fiscally responsible choice is to live within our means and balance our Federal budget.

A newspaper columnist, Diane Badget from Lovell, WY, said it best when she wrote how her mother would react to what is happening in Washington today. Diane wrote, "Momma always said, 'If you don't have enough money to buy a quart of milk you don't take someone else's hard-earned cash and buy ice cream.'"

If we fail to heed that warning, we will be responsible for passing along unsustainable costs and obligations to our children and grandchildren. That is where the Reid bill is taking our country.

The only remaining question is whether we will have the courage to stop this process and preserve our Nation's strength for future generations.

Mr. HATCH. Mr. President, I rise today to express my great concern about the need for the legislation before us, which would increase the Nation's debt limit.

It is sad and disturbing that the last vote we will take this year before recessing for the Christmas holiday is one to increase the already almost unimaginably high \$12 trillion debt ceiling.

What a horrible gift to deliver to the American taxpayer on this Christmas Eve. In a season when most families have cut back their own spending and, in many cases, cut up their own credit cards, the Democratic majority is asking us to increase the Nation's credit card limit so that they can continue to take on more debt to cover their voracious appetite for spending.

Up until a few days ago, the Democratic leadership was actually looking for a way to increase the debt limit by more than \$1.8 trillion, which would have been more than twice as much as the largest previous increase in the debt limit. They were looking for a virtual blank check to continue their unrestrained deficit spending all the way through next year's election.

The fact that the majority party could not come to a consensus among its own ranks on this outrageous plan is evidence enough of the brashness and hubris of the other side. Apparently, even a drunken sailor can be embarrassed enough to show a modicum of restraint if the price tag is high enough.

Plain and simple, we need to take control of this out-of-control government spending before we see the hopes and dreams of our children, grandchildren, and all subsequent generations of Americans dashed against the rocks.

Federal spending is now taking the largest share of our national income since the early 1950s and the current deficit is as large as it has been since World War II. This is bad enough, Mr. President, but there is no end in sight to the profligacy.

Based on current projections, which will probably get much worse, 10 years from now it will be shown that this President and this Democratic majority have left a shameful legacy. The CBO estimates that in 2019, the Federal deficit will still be over \$1 trillion for that 1 year and that our total national debt will be over \$20 trillion. Most of our new borrowing will be needed just to pay interest on the previous debt.

At some nearby place, which we are fast approaching, we will reach a tipping point where we will be in total bondage to this debt. When we get to the time that we are borrowing vast and ever-increasing sums just to pay the interest on previous debt, the hopes of ever escaping from the vortex of financial destruction will fade and we will have consigned the next generations to a permanent substandard of living.

The other side keeps making the pathetically lame excuse that they inherited eight years of bad economic policy, which they say is the real culprit of our fiscal problems. What is conveniently forgotten around here is the fact that the final two of those eight years were under a Democratically led Congress.

I am the first to admit that Republicans in Congress were too eager to spend and that President Bush should have wielded his veto pen more aggressively. There is some accountability there. But let us face it, our side are rank amateurs compared to the consummate spenders we now have in charge.

For proof, we need look no further than the President's budget, the trillion dollar stimulus bill, this \$2.5 trillion health care bill, and the recent \$1.1 trillion omnibus spending bill with its double digit percentage increases over last year's spending. The deficit has grown exponentially this year alone.

The numbers themselves tell the story. The Treasury Department's Monthly Treasury Statement for November shows a deficit over the first two months of this new fiscal year alone of nearly \$300 billion. This 2-month deficit is greater than the full-year deficits in 2002, 2006, and 2007, which, by the way, are part of the past eight years that were supposed to represent the ultimate in reckless spending.

I am scared. All Americans should be frightened as well. We are on an unstable raft in the middle of an increasingly raging river. The currents are swirling around us and we are beginning to lose control of where we are going. Sharp rocks are starting to appear in the river that threaten our destruction.

Our alarm grows as we begin to hear a sound off in the distance that slowly gets louder as we head downstream on these increasingly wild rapids. The sound we hear is the cataract that represents our fall from the greatest nation in the history of mankind to that of a second-rate player on the world stage. Can you hear it? Can we find a way to turn this boat around before it is too late to avoid the fall? Many of my fellow Utahns can hear it and they are begging me to find a way to get us off this destructive course and get us back to safe waters.

The first step is to reject this debt limit increase. Let us cut up the credit card and stop this frightening spending spree before it takes us to the precipice.

It is a good thing we are recessing for a few days. The Members of this Senate need to go home and get a reality check from those who have sent us here. I hope that over the recess each of us will get a message, loud and clear, from our recession and debt-weary constituents that they are sick and tired of this fiscal irresponsibility. They are demanding change, and they will get it, one way or the other.

I hope that in the new year, we can consider these messages and find a new resolve to come together, to find the restraint that is simply lacking now, and to reverse this reckless spending so we do not send our country down the river.

The VICE PRESIDENT. The majority leader is recognized.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. REID. Mr. President, the minority leader and I have some things to discuss, so I ask unanimous consent that we recess subject to the call of the Chair.

There being no objection, the Senate, at 7:35 a.m., recessed until 8:26 a.m., and reassembled when called to order by the Presiding Officer (Ms. CANTWELL).

The PRESIDING OFFICER. The Senator from Nebraska.

HEALTH CARE REFORM

Mr. NELSON of Nebraska. Madam President, during the consideration of the health care bill, one of my primary concerns has been ensuring that the longstanding Hyde amendment would be incorporated into the bill. I have strongly held views on the subject, and

I fought hard to prevent tax dollars from being used to subsidize abortions.

I was pleased that the House included strong abortion provisions in its health care bill in the form of the Stupak amendment. I modified this language to meet the Senate bill and offered the Nelson-Hatch-Casey amendment to prohibit Federal funding of abortion, and I was disappointed to see that amendment was tabled by a vote of 54 to 45.

I knew then that the underlying bill did not adequately prohibit Federal funding of abortion and, consequently, I would not be able to support it. So I began to look for other language to accomplish the goal that no public funds should cover abortion in the new health care bill. After long days of negotiations, I believe we came up with a true compromise that stays faithful to my principles.

I want to be clear, I stuck to my guns and stood for my pro-life principles. I did not look for weaker language. I looked for clearer language, and my goal stayed the same: to maintain the standard that we have had in Federal law since the mid-1970s.

While I respect the opinion of the Senator from Kansas, I have to respectfully disagree. The Senate language fully upholds the Hyde principle like the language in the House bill. The wording may be different, but the principle is, in fact, upheld.

Under the health care bill, if you cannot afford insurance, you will receive Federal assistance to help pay for a private health care plan. The Stupak language prohibits that Federal assistance from paying for insurance that covers abortions. If you like a plan that covers abortion, you must purchase a rider or an endorsement to your plan with your own funds. You could do that as well by writing just one check to the insurer. For that you get a separate piece of paper addressing abortion.

The Senate language, with my added compromise, also prohibits Federal funds from paying for private insurance that covers abortion. The only difference is that in the Senate bill, if you are receiving Federal assistance to buy insurance, and if that plan has any abortion coverage, the insurance company must bill you separately, and you must pay separately from your own personal funds—perhaps a credit card transaction, your separate personal check, or automatic withdrawal from your bank account—for that abortion coverage.

Now, let me say that again. You have to write two checks: one for the basic policy and one for the additional coverage for abortion. The latter has to be entirely from personal funds.

So under both the Stupak and the new Senate language, no Federal funds can be used to pay for a plan that covers abortion, and if you choose to pur-

chase abortion coverage—if it is available—you must pay out of your own pocket.

Furthermore, the Senate language allows States the right to ban public and private insurance from supplying abortion coverage. Already, 12 States ban abortion coverage on public plans and 5 States ban abortion coverage on both private and public plans. So, in short, the Senate bill ensures, once again, no Federal funds would be used for abortion.

I would like to note that the Senate bill goes beyond Stupak in two life-promoting ways. One, it adds funding to support pregnant and parenting teens and women and, two, it expands the adoption tax credit to help adoptive parents with the considerable expense of adoption by making that credit a refundable tax credit. This means many potential parents who lack the regular resources to adopt will now be in a better position to do so.

The Senate bill also contains the same strong conscience protections included in the Stupak language. We tried winning approval for the Nelson-Hatch-Casey abortion language in the Senate, but we were unsuccessful. However, we did not give up. I know people have very strong feelings about the issue of abortion, and I respect those who disagree with my position, but I could not support health reform that did not maintain the 30-year standard barring public funding of abortion. I did not compromise my pro-life principles; we just found different wording, different language, and both will work. I believe people will see that no public funding will go to abortion.

In addition, my provision empowers the States to pass laws banning the sale of insurance that covers abortion. We make it clear that this new law, this new bill does not in any way preempt the rights of States to be able to continue to make that ban in the decisions they might make legislatively, and we want to make certain there is no doubt but that this bill has no preemption of the States rights.

Despite what some partisans and talk show hosts say in their scare tactics, the conscience clause remains. Also, despite what those same people and even some of my colleagues have said, the bottom line is that the Senate health care bill will not allow taxpayer money to pay for abortion, period.

Thank you, Madam President. I yield the floor.

MORNING BUSINESS

Mr. NELSON of Nebraska. Madam President, I ask unanimous consent that the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON of Nebraska. Madam President, I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BROWN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWN. Madam President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWN. Madam President, I come to the floor today to talk about the Patient Protection and Affordable Care Act, which, in a historic vote only an hour and a half ago, the Senate overwhelmingly passed. I wish to talk for a moment about how that bill will improve the health of children across our country, particularly for children in my State of Ohio.

Ohio is home to six of the best children's hospitals that house a combined 1,749 beds. Ohio is also home to 218,400 uninsured children. The health reform bill which we have been debating on this Senate floor for 26 straight days will help cover Ohio's uninsured children and help our children's hospitals provide the right care at the right time in the right place. This legislation will make sure the children have access to oral and vision care. It will keep children healthy by eliminating copays and deductibles for recommended preventive care.

Similarly, in the Medicare section of the Patient Protection and Affordable Care Act, senior citizens in Olympia, Redmond, Seattle, Cleveland, Akron, and Canton will be able to get free mammograms and colonoscopies and preventive care and annual checkups. Children, too, under this legislation will have copays and deductibles eliminated for recommended preventive care.

It will extend the Children's Health Insurance Program for an additional 2 years and provide States with additional funding to ensure children have access to this program. It will increase the number of pediatric primary care physicians and pediatric specialists. And we now know how important it is, as I learned at Akron's Children's Hospital a decade and a half ago, that the government assist in helping with training and providing funding through Medicare and through appropriations to train pediatric primary care physicians and specialists.

Perhaps most important of all is this legislation will do something Senator LAUTENBERG, Representative SCHWARTZ, and I have tried to do for 3 years: it will eliminate immediately the preexisting coverage exclusion for children. For the past two Congresses,

Senator LAUTENBERG, Representative SCHWARTZ, and I have introduced the Children's Health Protection Act, legislation that would prevent insurers from denying children needed medical care.

Twenty percent of school-age children suffer from a chronic illness—20 percent. All too often, these children face challenges accessing affordable and adequate health insurance due to their preexisting conditions. Children have preexisting conditions too. Yet children with preexisting conditions are so often denied medical insurance by insurance companies.

Our bill, which is largely included in the Senate health reform legislation which we passed an hour and a half ago, would ensure children suffering from chronic and debilitating and life-threatening illnesses have access to comprehensive and affordable health care coverage.

This bill will help children such as Shaunell Johnson from Ohio. When her parents were unable to care for her, Shaunell was adopted by her grandparents, Dorothy and Jack Johnson. Because their income exceeded the limits for medical income eligibility, they turned to the private health insurance market for Shaunell. However, due to her asthma, a preexisting condition, the Johnsons were unable to afford health insurance because they earn more than would qualify Shaunell for Medicaid but they don't earn enough to afford the \$8,700 a year for private insurance coverage for a child with a preexisting condition.

Children with serious medical conditions shouldn't be cherry-picked out of health insurance policies while their families struggle to provide care and pay medical bills.

The time has come for Congress to act on behalf of children such as Shaunell and the Senate has acted today.

We must insure that children most in need are no longer denied access to health coverage. We must immediately prevent the insurance industry from denying millions of children the health care they need.

The health care reform legislation we passed an hour and a half ago will do that.

Let me explain again why this matters and give some examples. A woman named Renee has a 5-year old boy in Ohio with hydrocephalus. He has a shunt that drains the fluid from his brain down to his belly. That said, he is a healthy, smart, and extremely happy little boy.

His neurosurgeon said he is truly a best-case scenario—very healthy. However, no insurance company will take him—no quote, no interest in looking at his medical charts, nothing.

Renee said her family is truly left with no options for health care, unless she and her husband close down their

business and go to work for corporate America and get in a huge health insurance pool plan.

Renee, writing about her son, says she can't get him health insurance because he has a preexisting condition. This bill, as soon as the President signs it, will say to the health insurance industry: You can no longer deny, refuse, or lock out insurance for a family because they have a child with a preexisting condition.

Think of the progress and of the thousands whom I mentioned in the beginning and the 1,700 children's hospital beds in the children's hospitals in my State. There are 200,000 uninsured children in Ohio. Many of them are sick enough that they are deemed by the insurance company as having a preexisting condition. No longer.

When the President signs this bill in January, children from Seattle to Cleveland, from Cincinnati to Tacoma, will be able to be on their parents' health insurance policy and be able to get the coverage they need.

I will share two other stories.

Laurie writes:

As a mother who had to deal with a baby born with problems and had many days of hospital stays, and many months of in-and-out-of appointments and check-ups, I realized the vital importance of health care.

I was one of the lucky ones I guess, as I did have good insurance at the time.

As a healthcare provider myself, I see too often parents not being able to get their child seen [by a physician] due to lack of insurance that does not cover the costs of anything true.

It is our children who will be our future and those in Congress' future. When will enough be enough?

An hour and a half ago, we answered that question, when will enough be enough, when we made this decision collectively—60 of us, an overwhelming majority in the Senate—that children with preexisting conditions will no longer be denied health insurance.

Cassandra, a 14-year-old from Toledo, is uninsured simply because she is sick. She suffers from seizures and, as a result, no insurance company will cover her.

Cassandra is a nationally ranked figure skater and once skated with Michelle Kwan, but after selling their home and everything else they own and putting \$30,000 on their credit cards just to pay for Cassandra's care, the family had to finally sell her ice skating equipment on eBay.

Her parents do everything they can to protect their daughter, including buying dim lights and blackout drapes and making sure there aren't too many breakable items in the house.

Cassandra gets treatment for her seizures through the State's Bureau for Children's Medical Handicaps, but they are on their own for Cassandra's basic medical needs.

Cassandra's life will get better. Her family's life will get better because of

what the Senate did an hour and a half ago. When the President signs the bill, she will not be denied insurance for a preexisting condition. Her family will be able to pay—at a reasonable cost—for insurance so Cassandra will not have to rely on this State program that only takes care of procedures but can get the comprehensive care she and every other child in this country deserve.

That is why I introduced this amendment, and that is why Senator LAUTENBERG and I worked on this legislation.

Every year in my State, over 2 million kids are treated at Ohio's children's hospitals. Next year will be the first year that, when they leave the hospital, they will not have to worry about insurance companies denying them care based on a preexisting condition.

COMPREHENSIVE IRAN SANCTIONS, ACCOUNTABILITY, AND DIVESTMENT ACT

Mr. REID. I want to speak today about S.2799, the Comprehensive Iran Sanctions, Accountability, and Divestment Act of 2009. This important piece of legislation, which combines legislation written by Senator DODD with legislation introduced by Senators BAYH, LIEBERMAN and KYL, was passed by the Banking Committee earlier this month. It would impose new sanctions on Iran's refined petroleum sector and tighten existing U.S. sanctions in an effort to create new pressure on the Iranian regime and help stop Iran from acquiring a nuclear weapon.

I know that Senator KERRY, the chairman of the Foreign Relations Committee, has been working hard, along with other colleagues, to get a UC agreement so we can get this legislation passed. I understand that we are making good progress towards reaching that goal.

As we move forward with these negotiations, I want everyone to know that I am committed to getting this legislation to the floor sometime after we return in January.

Mr. DODD. I thank the majority leader for all of his help in trying to move this legislation forward. This comprehensive sanctions legislation would arm the administration with critical tools to apply additional pressure on the Iranian regime and disrupt its proliferation and terrorist activities at a pivotal time—a time when Iran's leaders continue to flaunt the will of the international community, trample on the rights of its own people, and threaten the national interests of the United States and our strongest allies, including Israel.

It is now clearer than ever that tougher sanctions must be a key element of our comprehensive Iran strategy going forward. My primary goal with this bill is to prevent Iran from

developing a nuclear weapons capability. That is why this measure passed the Senate Banking Committee unanimously in October, and I had hoped that we would be able to consider it in the Senate and move toward a conference with the House before we went out for the holidays. While I would have strongly preferred that, I recognize that given the delays on health care reform, we will not now have time to do that. I am also aware that the administration continues to have some concerns about how to create incentives in the bill for countries to cooperate more closely with U.S. efforts to impose tough new multilateral sanctions. I believe we have made some progress in our discussions of recent days, and I am grateful that the majority leader has indicated his willingness to move forward on the bill as soon as possible after we return.

Mr. KERRY. I appreciate Senator REID's commitment to move forward with this legislation and his support of the progress we are making towards a UC agreement. We all share the goal of creating maximum leverage in our efforts to prevent Iran from developing a nuclear weapon—this is a vital national security goal of the United States, and obviously of critical importance to our allies in Israel and around the world.

I believe that this legislation has the potential to make an important contribution to that effort. Having the Senate stand united with the administration behind this legislation would send a very strong and positive signal. That is why many of us are committed to working with the administration and the bill's sponsors to craft an amendment that all can agree on. I know these discussions will be continuing during recess with the intention of reaching a mutually agreeable resolution so that this legislation can be considered as soon as possible when we get back.

TRIBUTE TO CHARLES E. BRUEGGEMAN

Mr. DURBIN. Madam President, today I would like to recognize the extraordinary work of First Deputy Director Charles E. Brueggemann of the Illinois State Police. Mr. Brueggemann has served with distinction for 25 years with the Illinois State Police, including as second in command of the department since April 1, 2008.

Mr. Brueggemann began his outstanding career with the Illinois State Police in 1985, serving in patrol, as well as a variety of investigative positions to include narcotics, homicides and crimes against persons. He also served during his tenure in management positions that contributed greatly to the department and community he served. Those positions included district commander, executive officer, assistant

deputy director, deputy director and first deputy director.

As first deputy director, Mr. Brueggemann oversaw the agency's five divisions—operations, forensics, information and technology command, internal investigations, and administration. He was responsible for the oversight of the director's principal advisors assigned to legislative affairs, public information, inspections and budget.

In his prior position, Mr. Brueggemann had oversight of the operations division, with wide-ranging responsibilities including patrol, investigations, homeland security and gaming. While serving in that capacity, Mr. Brueggemann was charged with coordinating a plan to reduce highway fatalities. Under his leadership, the division developed a remarkable strategy that reduced highway crashes to their lowest level in 87 years.

In other honors, he was selected in 2005 by the FBI to attend a counterterrorism leadership program that involved traveling abroad with seven other major city, State, and Federal law enforcement executives to share information and open lines of communications between different nations in the fight against terrorism. Law enforcement officials from Scotland, England, Northern Ireland, and Canada also participated.

Mr. Brueggemann received his bachelor's degree from McKendree University and a masters degree in Homeland Defense and Security from the Naval Postgraduate School. Married for more than two decades to his wife Susan, they have two daughters Beth and Ali.

I congratulate Mr. Brueggemann on his retirement and thank him for his service to the people of Illinois.

SENATE PARLIAMENTARIANS

Mr. DEMINT. Madam President, one of the important officers in the Senate is the Senate Parliamentarian. The Senate rules are arcane and often vague, and the Parliamentarian is responsible for making sure they are properly applied. Our four Parliamentarians put in long, thankless hours in service to their country. They get no glory, no public accolades. They rarely get high fives for getting the rulings right, but we are always too happy to tell them when we think they got it wrong. Often our disagreement is not with the Parliamentarians, but with the precedents themselves.

The Senate often chooses to sidestep its rules, creating precedents that become loopholes in the rules, which bind the Parliamentarian in the future. We should be careful to avoid these situations because we can unwittingly trample on the right of the minority.

I want to make it clear that while I do have occasional disagreements with the Parliamentarian's office, I still be-

lieve they are doing their best to be fair and to apply the rules and precedents as they see them.

HONORING OUR ARMED FORCES

CORPORAL XHACOB LA TORRE

Mr. DODD. Madam President, it is with a heavy heart that I rise today to mark the passing and honor the service of Marine CPL Xhacob LaTorre of Waterbury, CT.

Corporal LaTorre died this week of wounds he sustained from a roadside bomb while on patrol in Afghanistan's Helmand province. He would have celebrated his 22nd birthday last Saturday.

Corporal LaTorre graduated from Crosby High School where he was active in the ROTC program. A born leader, he joined the Marine Corps in 2005. He was on his third tour of duty, having served two tours in Iraq and was awarded a good conduct citation and a Purple Heart.

In his too short time, Corporal LaTorre proved himself as a soldier and a patriot. The bravery and dedication he showed as a marine, however, was just one side of his personality. To his friends and family, Xhacob will be remembered as an outgoing and energetic young man with a kind heart, a penchant for mischief, and an infectious sense of humor.

As a young boy, Xhacob earned pocket money by going from table to table at a restaurant, charming patrons and earning a dollar for each joke he told.

That young boy grew into a man of integrity and courage. His service and his sacrifice are a credit to his parents, Daniel and Nicole. I know how proud they are of him, and I hope they know that we grieve alongside them. They, along with Xhacob's wife, Frances, and his young son, Javier, are in our hearts.

It may seem at times a sad irony that our best and brightest young men and women are the ones who go into battle and sometimes do not come home, having given their lives in service to their country. But that is what keeps our Nation strong and free.

All of us in Connecticut and across America mourn the loss of CPL Xhacob LaTorre. And none of us will ever forget the debt of gratitude we owe to him and his family.

I ask unanimous consent to have printed in the RECORD the attached articles.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FAMILY AND FRIENDS SAY GOODBYE TO
FALLEN MARINE

(By Amanda Raus and Doug Greene)

Family, friends and fellow Marines went to the Chase Parkway Memorial on Wednesday to pay their respects to Corporal Xhacob LaTorre, a proud Marine dedicated to serving his country who lost his life fighting for it.

On Thursday morning, the Patriot Riders were there, with flags to salute the fallen Marine on a bitterly cold December morning.

"It is a very sad day for us," LaTorre's aunt, Carmen Lasalle, said. "May God help us all overcome such a big loss. We will make sure we all teach little Javy the same values we taught you and from Heaven where you will be resting in peace and looking after your son and wife, I hope to feel your smile."

"It's deeply moving, a debt of honor. We're indebted to him for the service he's provided to our country," said Peter Verseckas, a former Naval Reserve man on Wednesday.

LaTorre was in his third tour of duty, stationed in Afghanistan, when he was injured by a terrorist bomb in August. He lost both his legs but never lost his spirit. For four months he fought for his life with his wife, Frances, by his side the whole time.

"I got the call he was going to die at any moment. I went running, and I was there, and as soon as I got there, he died," said Frances LaTorre.

Even at the very end, LaTorre was happy. That's how his family always knew him to be. They say he was a fun-loving person who put others before himself.

"He was wonderful, he was always there for everyone. Every person that he touched was special, special to him," said his aunt, Carmen LaSalle.

The people most special and closest to his heart were his family members, especially his 18-month-old son Javier. Frances says he's already a spitting image of his father.

"He looks just like him. He does a lot of the same things his father does," she said.

"To me, it's like he never left. Seeing his son, is seeing him grow up all over again," said Xhacob's brother, Danny LaTorre.

And while they watch Javier grow, they'll remember the dedicated husband, brother, nephew, father and Marine LaTorre was.

"Everybody makes great sacrifices. He made his. I'll always honor and treasure that," said Danny LaTorre.

A funeral service was held on Thursday morning at 10:30 a.m. at the Chase Parkway Memorial. Then Corporal LaTorre will be buried with full military honors at the State Veteran's Cemetery in Middletown.

WATERBURY MARINE DIES IN AFGHANISTAN

WATERBURY (WTNH)—A Marine from Waterbury has died from wounds he received in Afghanistan, the Defense Dept said Thursday.

He's identified as Corporal Xhacob LaTorre, and he was 21 years old.

The DoD says Cpl. LaTorre died Dec. 8th "of wounds sustained while supporting combat operations in Helmand province, Afghanistan."

LaTorre graduated from Crosby High school in 2005. His family still lives in Waterbury.

"I know the city of Waterbury will rally in support of the family and for his dedicated service," said Mayor Michael Jarjura (D-Waterbury).

LaTorre leaves behind a wife and son.

In a statement posted on Facebook, Cpl. LaTorre's sister said "Thank you so much for loving Xhacob and for the time you all shared with him. He was unique and will always be with us."

Cpl. LaTorre was assigned to 2nd Battalion, 8th Marine Regiment, 2nd Marine Division, II Marine Expeditionary Force out of Camp Lejeune, N.C.

Waterbury lowered the flag over City Hall to half staff in Cpl. LaTorre's honor.

Gov. Jodi Rell ordered all flags in the state to be lowered to half-staff until sundown after LaTorre's funeral.

"On behalf of all Connecticut residents, I extend heartfelt condolences to Corporal LaTorre's family and friends," Governor Rell said. "He made the ultimate sacrifice to protect our country and our way of life, and we will honor his selfless service by lowering our flags. Corporal LaTorre is truly a hero."

There was no word on funeral arrangements.

GOVERNOR RELL: FLAGS AT HALF STAFF TO HONOR FALLEN MARINE

Governor M. Jodi Rell today ordered U.S. and State of Connecticut flags to half staff to honor a U.S. Marine from Waterbury who was supporting Operation Enduring Freedom in Afghanistan.

Cpl. Xhacob LaTorre, 21, died December 8 of wounds sustained while supporting combat operations in Helmand province, Afghanistan. He was assigned to 2nd Battalion, 8th Marine Regiment, 2nd Marine Division, II Marine Expeditionary Force, Camp Lejeune, N.C.

"On behalf of all Connecticut residents, I extend heartfelt condolences to Corporal LaTorre's family and friends," Governor Rell said. "He made the ultimate sacrifice to protect our country and our way of life, and we will honor his selfless service by lowering our flags. Corporal LaTorre is truly a hero."

Flags will remain at half staff until sundown on the day of Cpl. LaTorre's funeral. Arrangements are to be announced.

TRIAL OF LIU XIAOBO

Mr. DORGAN. Madam President, I want to briefly draw your attention to an extraordinary trial that took place in Beijing yesterday morning. Mr. Liu Xiaobo is a 53-year-old writer and social critic and one of China's most prominent advocates of democratic reform. After being detained without charges for over a year, he went on trial yesterday morning in a 3-hour proceeding closed to the public. If convicted, Mr. Liu faces up to 15 years in prison. His verdict is likely to come on Friday, Christmas Day.

What was Mr. Liu's crime?

He was tried on charges officially defined as "incitement to subvert state power." Mr. Liu's calls for open elections and free speech were viewed as a threat to the ruling Communist Party.

What precisely did he do that got him into trouble?

He contributed to "Charter 08," a political manifesto calling for human rights and the rule of law in China. The manifesto was posted on line last December and quickly gained thousands of signatures by Chinese workers, teachers, and retired party members. Its name is a reference to Charter 77, a Soviet-era petition by Czech dissidents like Vaclav Havel.

Mr. Liu's crimes are nonexistent. Yet his fate has been predetermined. In short, his trial is a travesty of justice:

Mr. Liu's 3-hour trial was closed to the public. Even his wife was not allowed to attend. She has been relentlessly harassed and unable to speak to him since March.

Officials warned Mr. Liu's supporters to stay away from the trial and not write about it online. Police detained some people who came to the courthouse to show support.

His verdict will be announced on Christmas Day. This is an obvious calculation so that the verdict's announcement will garner less international attention.

According to his brother, one of the two family members allowed in the courtroom, Mr. Liu told the judge that "if he was sent to jail, it might bring others freedom of speech."

I was struck by a report in yesterday morning's New York Times that an unemployed meat plant worker took an 18-hour train ride from his far-flung province to show solidarity outside of the courthouse in Beijing. The worker said he had never met Mr. Liu, but that they had exchanged emails.

He also said proudly that he had signed "Charter 08" and pulled out a copy of it from his backpack and handed it to a courthouse official. The worker's intent was clear: "I am not afraid. I love China. I just want my country to have freedom and human rights."

The trial of Mr. Liu is a sad milestone that has further diminished hopes that China's economic rise would bring about significant political and legal reforms. During the past year, as the Congressional-Executive Commission on China's reporting has shown, the government has tightened restrictions on the Internet, harassed the country's human rights lawyers, and jailed muckrakers, working with grieving parents, blamed shoddy school construction for the deaths of thousands of children during the 2008 Sichuan earthquake.

We will learn the court's verdict and its jail sentence for Mr. Liu on Christmas Day. I call on China's leaders to demonstrate compassion and genuine commitment, not just in words but in deeds, to the rule of law and fundamental rights by dismissing the case against Mr. Liu. In doing so, the Chinese Government would be recognizing the serious procedural flaws that have taken place in this case. It would also signal to the rest of the world that the Chinese Government is committed to developing the rule of law and upholding international human rights standards.

SENATE RESOLUTION 387—URGING THE PEOPLE OF THE UNITED STATES TO OBSERVE GLOBAL FAMILY DAY AND ONE DAY OF PEACE AND SHARING ON JANUARY 1, 2010

Mr. INOUE (for himself, Mr. REID, and Mr. AKAKA) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 387

Whereas in 2009, the people of the world suffered many calamitous events, including devastation from tsunamis, terror attacks, wars, famines, genocides, hurricanes, earthquakes, political and religious conflicts, diseases, poverty, and rioting, all necessitating global cooperation, compassion, and unity previously unprecedented among diverse cultures, faiths, and economic classes;

Whereas grave global challenges in 2010 may require cooperation and innovative problem-solving among citizens and nations on an even greater scale;

Whereas on December 15, 2000, Congress adopted Senate Concurrent Resolution 138, expressing the sense of Congress that the President of the United States should issue a proclamation each year calling upon the people of the United States and interested organizations to observe an international day of peace and sharing at the beginning of each year;

Whereas in 2001, the United Nations General Assembly adopted Resolution 56/2, which invited "Member States, intergovernmental and non-governmental organizations and all the peoples of the world to celebrate One Day in Peace, 1 January 2002, and every year thereafter";

Whereas many foreign heads of State have recognized the importance of establishing Global Family Day, a special day of international unity, peace, and sharing, on the first day of each year; and

Whereas family is the basic structure of humanity, thus, we must all look to the stability and love within our individual families to create stability in the global community: Now, therefore, be it

Resolved, That the Senate urgently requests—

(1) the people of the United States to observe Global Family Day and One Day of Peace and Sharing on January 1, 2010, with appropriate activities stressing the need—

(A) to eradicate violence, hunger, poverty, and suffering; and

(B) to establish greater trust and fellowship among peace-loving countries and families everywhere; and
